Movement DAO (branch deployed)

Let's start a movement

2/2/22 2:22pm PST

Today, a Movement begins.

Vision: Unleash our collective potential

MOVE believes that we already have the passion, intelligence, and resources to solve the world's greatest problems. What's missing is the right incentive design.

MOVE is an experimental platform to promote social, public good and environmental change.

Solving societal problems is an age-old challenge with few solutions. These solutions are built upon legacy infrastructure and bureaucratic processes. The more dollars spent, the more inefficient, ineffective, and corrupt our systems become. The people, who's hard-earned dollars have been siphoned into these black holes, are only left with broken promises. The result: with every \$1 contributed, \$0.90 goes to the void, and \$0.10 goes to impact.

MOVE introduces a radical new approach to collective problem solving. We hope that MOVE makes our imagination the only limitation to societal change.

How it Works

Web 2.0 movements live on Twitter, Facebook and GoFundMe. Web 3.0 Movements will live on DAOs.

Web 3.0 Movements are owned by their token holders. They have trustless funding that aligns incentives. And their leaders are held accountable by the community.

MOVE is building a better way for Movements to organize. The platform is currently under development and conducting a token presale to fund its endowment.

Learn more about the vision for movements on Movement DAO.

MOVE Token System

- 1. The **\$MOVE token** governs the platform. These token holders are responsible for growing the endowment and deploying capital into movements.
- 2. **\$(Movement) tokens** govern individual movements. These token holders are responsible for funding & supporting their communities' projects. Movements have their own token (ie. \$BLM).

\$MOVE Governance tokens

The Movement DAO is governed by its staked token holders. **\$MOVE** tokens represent the power to influence change to governance, economics, and incentives in the Movement DAO.

Benefits to **\$MOVE** token holders include voting on matters relating to:

- Movement leaders, senators to represent the community
- Endowment management from operational expenses to DeFi protocols
- \$MOVE Governance tokens are not to be deemed or interpreted to be representative of any kind of:
 - Currency, legal tender, money or deposit
 - Investment (whether secured or unsecured), equity interest, proprietary interest and economic rights
 - Equity, debt or hybrid instrument, security collective investment scheme managed fund, financial derivative, futures contract, deposit, commercial paper, negotiable instrument, investment contract, note, bond, warrant, certificate or instrument entitling the holder to interest, dividends or any kind of return, nor any other financial instrument; or...
 - Right, title, interest or benefit whatsoever in whole or in part, in any person or property, or any assets

\$MOVE Governance tokens are not guaranteed or secured by any person, asset or entity in any way. The team is not under any obligation to issue replacement tokens if they are lost, stolen, destroyed, or otherwise inaccessible for any reason.

(1) **\$MOVE** Governance tokens are not guaranteed or secured by any person, asset or entity in any way. The team is not under any obligation to issue replacement tokens if they are lost, stolen, destroyed, or otherwise inaccessible for any reason.

Individual \$Movement tokens

Movement token holders are responsible for voting on the leadership of their movements, along with determining economic design and governance aspects of the movements. \$(Movement) tokens have their own unique ticker symbols (\$ABC, for example). Most importantly, the movement token holder communities collaborate and vote on which leaders to elect. These leaders choose the actions they wish to fund.

Benefits to \$(Movement) token holders

- · Governance of the Movement and governance proposals
- Launch movement actions
- · Elect movement leaders
- (!) \$Movement tokens are not to be deemed or interpreted to be representative of any kind of:
 - · Currency, legal tender, money or deposit
 - Investment (whether secured or unsecured), equity interest, proprietary interest and economic rights
 - Equity, debt or hybrid instrument, security collective investment scheme managed fund, financial derivative, futures contract, deposit, commercial paper, negotiable instrument, investment contract, note, bond, warrant, certificate or instrument entitling the holder to interest, dividends or any kind of return, nor any other financial instrument; or...
 - right, title, interest or benefit whatsoever in whole or in part, in any person or property, or any assets

\$Movement tokens are not guaranteed or secured by any person, asset or entity in any way. The team is not under any obligation to issue replacement tokens if they are lost, stolen, destroyed, or otherwise inaccessible for any reason.

Token Distribution

\$MOVE tokens and \$(Movement) tokens are distributed via a bonding curve, a systematic formula that determines the price at which each incremental token is minted based on total supply. Details of this mechanism are explained here and here, and here.

After the initial \$MOVE Distribution via contributions to the endowment and via a community Merkle distributor airdrop, the community will manage the remaining treasury through Snapshot.

A break down of the token distribution and allocation can be found here.

(i) A bonding curve describes the relationship between the price and supply of an asset. It is a mathematical concept modeling the idea that the price of an asset (with a limited quantity) increases slightly for subsequent buyers with each purchase, source

Movement DAO Endowment

A number of platforms exist which enabled communities to raise funds, notably, Juicebox. Movement DAO includes an endowment which it will use the DeFi earned Yield to fund additional tooling for funded projects to deploy liquidity pools (LPs), and navigate more complex blockchain applications and tooling.

The Movement DAO's initial endowment is at the Gnosis Safe

0x46D65c64E883f70371A6fcAcB124FB5dd68c9918 is intended to be the catalyst for additional endowment contributions and individuals interesting in forming their own DAOs around a movement subject.

Each of the Gnosis Safe contributors during the Seeding period are provided the \$MOVE token.

Movement DAO Endowment Funding comes from:

- Gnosis Safe ETH (≡) or DAI contributions between February 2nd, 2022 2:22:22 and May, 2022 (exact date TBD).
- Movement submission tributes to Movement DAO.
- Tributes associated with any vesting or staking mechanics decided by the community.

Ongoing Endowment Growth comes from:

- 1. Endowment and Treasury management with a DeFi protocol.
- 2. Liquidity Pools for MOVE and $ETH \equiv$, or DAI.
- 3. Successfully funded \$(Movements).
- 4. Providing liquidity in liquidity pools for \$MOVE, and \$(Movement).

Proceeds of endowment earnings are deployed by the community.

Communities

Movement DAO envisions a world where decentralized communities organize & operate with the efficiency of a startup.

How DAOs organize on Movement DAO

Movements include a few key features to help their communities organize.

Leaders

All movements have discrete leadership positions, define election cycles, define compensation, and then elect those leaders. Movement leaders choose which motions are funded. The first leaders for a movement can either be *hardcoded*, or voted on by the community. Movement leaders are a dynamic feature that can enable many different types of communities to effectively organize.

Actions

All movements include Actions. Actions are a request for capital submitted by an individual, to a movement. This request describes the use of funds, milestones to release capital, official roles, and an ability for the submitter to verify their public identity through twitter integration.

Milestones enable a trustless system for deploying capital in stages for a large project.

Actions are submitted as a Motion. After a Motion has been approved it becomes a live Action.

Motions can include:

- Access to a service provider who can convert crypto into USD
- · Discrete roles with their own descriptions, salaries, and durations
- Complex voting mechanisms, such as conviction voting, quadratic voting, delegate voting, whitelist voting, and others.

(i) Bill Nye Motion Example

Assume Bill Nye the science guy wanted money to organize free science lessons for the community in Washington Square Park. He could submit an Action which describes multiple key milestones, such as getting started, securing a city permit, paying volunteers, purchasing supplies and finally giving the community lessons.

Now assume Bill Nye needs \$10,000 to fully complete his Action. And he gets \$2,000 upon successful completion of each milestone. Because Bill Nye is only compensated on a milestone basis, if the city were to deny his permit, the movement would have only paid Bill Nye \$2,000, instead of the total \$10,000. These milestones help to create a trustless system for deploying capital.

Milestone completion is verified and voted on by the community.

Actions also feature identity verification to reduce fraud. For example, when Bill Nye submits his Action he can prove that he is in fact the real Bill Nye, instead of the nefarious Nill Bye. He proves his identity by linking his twitter account to the movement.

All Actions have a 24 hour veto period before funds are moved. If the community suspects fraud they can flag the Action. Select community members possess veto power over all funds that exit Movement DAO. This process adds an extra layer of security for the Movement DAO community.

Future Innovation

Movement DAO is built with a modular architecture and is designed to benefit from future innovations to enable community collaboration. For example:

- 1. Movements can use "Gelato" (in development by Open Law) to enable gasless voting.
- Interface improvements. The best interface for a DAO is a challenging problem that will require continuous innovation.
- Actions can be infinitely deployed. For example, assume a movement wants to create a \$1,000 reward
 for every 1,000 trees that someone plants. It can create this actions once and anyone can claim the
 reward forever.

Roles

"How can I get involved?"

- As a movement leader Submit a proposal for a new movement or get involved in a new movement community. Movement leaders are often those who are proposing new movements, however communities may find more influential leaders that can grow their communities better over time.
 Additionally, leaders can choose to have delegates who they allocate a portion of their rewards to increase the scope of the network and its influence.
- 2. **As a developer** Join our Discord and stay active within the Developer channel. We encourage a collaborative developer community to help make the platform the best it can be.

Caa628823328200227274484 AD Dooren 1826-En Enteredor Diffe SIDON ACTO 2401292328 age 5 & 02246

3. As a community organizer - Decentralized communities require community members that take on leadership roles to help organize and mobilize their respective communities to take action and work together. Communities will naturally identify skillful leaders and create incentives to keep them engaged in these important roles.

Movement DAO Membership

In addition to participating in the community to brainstorm, weed out, and distill the very best \$(Movements), \$MOVE members are responsible for proposing and voting on the following:

- 1. How the endowment, long term, and short term funds are allocated,
- 2. Scoping out and executing upon the mission and vision of the DAO,
- 3. Engage and foster community in both as a steward of the endowment but in the tooling in which the DAO invests its time and energy to enable its members.

Movement DAO membership is required by the communities which use its platform to create \$Movements, is given to individuals who are stewarding it mission and goals, and is available to people who choose to help fund its treasury directly during the initial endowment seed or by acquiring its token on the secondary market.

What is a Movement?

Movements are fundamentally communities with a common purpose or goal formed with capital in order to take actions. The benefit of forming such a community in Movement DAO is to take advantage of the economies of scale and the intrinsic benefit of the financial tooling and capital enabled by its endowment.

While some community coordination may occur prior to the submission of a movement on Movement DAO, we believe Discord and other social media outlets may play significant part in the collaboration between parties to arrive at a consensus to the appropriate initialization parameters. To that end, Movement DAO intends to facilitate environments fertile for engagement.

What is an Action?

A community project with predefined funding requirements.

Actions are the mechanisms for how movements fund & monitor real world projects. Learn more about initiatives in the communities section.

How are Movements created?

- 1. Submit a movement on move.xyz.
- 2. Seed the first 500 DAI (this tribute is non-refundable).
- 3. Rally community & raise 50,000 DAI.

How does Movement governance work?

The community token holders and movement leaders govern the project. Because Movement DAO holds a large number of tokens, the Movement DAO collective is able to vote on individual movement initiative.

Movement DAO also has veto powers on any movements or initiatives that break the community guidelines.

Capital

Movement DAO seeks to equip movements with the best in DeFi by enabling them to benefit from a fully featured token built into their DAO.

How movements raise capital on Movement DAO

Movements are automatically created with a DeFi token ready to be listed on major DEX exchanges. This token includes key features to assist stable growth.

Endowment Basics

The purpose of the endowment is to earn via various DeFi protocols in order to produce a yield for the DAO which will be used for further blockchain development of tooling for its communities. The following are a few strategies which will be researched and employed with this goal.

① Movement DAO is embracing a model where community members with focus and expertise are delegated authority to act on role based proposals.

Movement endowments generate ongoing revenue through:

- 1. Yield farming using the operations budget and the endowment
- 2. Deploying liquidity pools to earn fees
- 3. Deploying liquidity pools between \$MOVE and \$(Movement)s with various strategies to earn fees
- 4. \$(Movement) Tributes, application submissions, and other Tribute based governance
- 5. Tribute's related to \$MOVE transaction (selling or buying, during or prior to a vesting schedule)
- 6. DeFi protocols beyond Yearn, Curve, Convex which may employ esoteric strategies
- 7. The \$MOVE endowment holds ~50% of tokens in all \$(Movement)s
- Profits from any revenue generating initiatives such as purchasing, fractionalizing and creating derivative NFT project

Backed Endowments

Backing an endowment allows movements to support their token price. Because token holders can always sell back to the contract for their pro-rata share of the endowment an implicit price floor is created.

(i) How it Works

Assume a movement has 1 million tokens and 10 million DAI in its endowment. Because this DAI is locked it implicitly backs each token at 10 DAI. More importantly, the endowment model sets up the infrastructure for explicitly backed tokens, a feature in the DAO roadmap.

Explicitly backed tokens can be sold back to the movement contract for their backed price. For example, assume a movement has 1 million tokens, 10 million DAI in its endowment, and 1 million DAI in its budget. A token could be sold back to the movement contract for 11 DAI. The movement will then burn this token.

Backed endowments enable:

- Democratized access to DAO creation.
 - Today, communities have few tools to guarantee that a new DAO is legitimate. This lack of trust has an unintended side effect. Major established players (groups we do love & respect) in the DAO community have an unfair advantage. Trustless financing through an endowment enables anyone to create a movement while protecting their community's contributions.
- Dead or unsuccessful movements to be equitably unwound.
 - If a movement raises money for an unsuccessful cause (Ken Griffin) and spends little to no money, community members have confidence that they can redeem their tokens.
- · Reduced fraud.
 - Endowments minimize the capital that a bad actors could remove from a community at one time.

Customized Funding Mechanisms

The movement budget is funded through custom funding mechanisms. These funding mechanisms are defined by the movement and can include entry tributes, exit tributes, endowment deflation and vesting penalties.

Customized funding mechanisms enables communities with diverse goals to effectively raise capital.

(i) Ocean Cleanup Example

The ocean cleanup movement has long term goals, and therefore might not set an entry or exit tribute and instead all capital would live in their endowment. Their budget would be funded through a low predefined deflation on the endowment. Therefore, community members have confidence in a predictable & sustainable community budget.

Natural Disaster Example

A community could rapidly organize to support victims of a natural disaster. They would set a 100% entry tribute and quickly deploy all funds raised.

(i) Viral Movement Example

A movement that's popular in the media (\$ROSS) could implement a long vesting period to dissuade pump and dump activity. This vesting period ensures that community members join the movement for the right reasons and provides long term funding from short term excitement.

Future Innovation

Movement funding mechanisms are fully modular and the project is still in its early stages. Movement DAO was designed for the community to build on further features. These can include:

- 1. Customized and complex bonding curve shapes. These choices will enable movements to further align their financing with their values.
- Implementing direct token backing. As discussed above, direct token backing helps to democratize DAOs.
- 3. Exploring the cutting edge in DeFi and giving movements the option to implement similar contracts.
- 4. Sophisticated price discovery for LPs.
- 5. Enabling movements the option to add continuous funding.
- 6. Enable an individual to seed a movement with ERC-20 tokens.

Compound Giving

Movement DAO manages a platform wide endowment which generates continuous revenue. This revenue creates sustainable movementing funding.

How the Movement DAO endowment works

Movement DAO tokens holders are responsible for effectively deploying revenue generated from the endowment. They can deploy this revenue into any of the following:

- 1. Compensating community members
- 2. Funding platform development
- 3. Purchasing movement tokens to be held in the Movement DAO endowment
- 4. Funding movement budget's directly
- 5. Funding movement endowments directly
- 6. Funding movement actions directly
- 7. Re-investing directly into the Movement DAO endowment
- 8. Funding giveaways to grow the platform

Movement DAO token holders also govern how the endowment manages its assets. These decisions include:

- 1. What tokens, and in what proportions, the endowment should hold
- 2. How tokens should be priced (Movement DAO controls a large amount of the liquidity and therefore controls the LP)
- 3. How to set an optimal platform tribute amount for movements and actions (submitting movements and actions require a platform tribute)

Movement DAO is fully managed by its token holders.

How does an endowment work logistically?

Movement DAO has a pool of capital called an endowment. Money in the endowment cannot be spent. The endowment's yield funds the platform.

The endowment capital also backs the tokens. Token holds will be able to sell their tokens back to the endowment for a pro-rata share of the entire endowment.

The endowment use an Unagii vault to yield farm assets.

Community Seeding

OaaGase23232002272KKK ADDoorrantB26-EnEmerchopt565Doorrand2020232Page23 CD246

The Movement DAO Community Seeding phase are funds which are transferred to the Gnosis Safe between February 2, 2022 2:22pm and May, 2022 (exact date TBD)

 \triangle Any ETH (\equiv) or tokens transferred **prior to** and **after the aforementioned time** will be considered donations to the Movement DAO.

Any ≡ or DAI transferred from a CEX (Coinbase, Gemini, or otherwise) will need to send the a. screenshot of your CEX transaction, b. Etherscan link to your transaction, c. Wallet address that you own, where you want the tokens dropped/claimed. Failure to provide the above will result in the loss of your tokens. The aforementioned information needs to be sent to Movement DAO Discord channel Super Admin, TBD.

 \triangle After you provide your CEX proof and replacement wallet information, it is your responsibility to verify this snapshot replacement with the csv updates provided to the Discord announcement channel.

After the contribution period, contribution snapshots will be sent to the announcement channel of Discord, for the community to verify contributions.

A contribution snapshot will be used to compute via a linear bonding curve the number of tokens to be issued.

(I) The Community Seeding is effectively the same as transferring ETH (E) or DAI to the Gnosis Safe. Which can be done without the use of our website tool. Your mileage may vary when it comes to using the CEX wallets to interact with our site.

What are the underlying assets in the endowment?

Movement DAO's initial endowment holds \$MOVE, \$DAI and some \$ETH. When movements are created Movement DAO will hold movement tokens in its endowment. It will use these tokens to provide liquidity. Movement DAO's endowment will earn LP fees.

The community retains the voting power to re-allocate capital.

How does the endowment earn money?

- 1. Yield farming the budget pool
- 2. Yield farming assets in the endowment
- 3. Owning a half of all movement tokens, for each movement (these tokens are used to provide liquidity for token holders) (the endowment will grow proportionally to the ecosystem)
- Network tributes when submitting movements

- 5. Tribute when selling vested tokens early
- 6. LP fees for providing liquidity on movement tokens
- 7. Profits from any revenue generating initiatives

Token Release

How it works

The following is the current plan for the token distribution of \$MOVE.

Phase 1. The Seeder's Endowment Contribution

The Movement DAO's Seed will occur February 2, 2022, 2:20am, and will total E n and n DAI.

Phase 2. Community Seeding of the Endowment

The Community public seeding period opens on **February 2, 2022, 2:22pm.** Contributions to the Gnosis Safe will be recorded via Github repository Bonding-Curve-Snapshot.

May, 2022 (exact date TBD) - Snapshot of the Gnosis Safe contributions

(i) Post Token Snapshot (May), The following phases will occur when the total token allocation can be properly computed.

Phase 3. Airdrop to the Community

The Movement DAO team values the cryptocurrency community at large, specific individuals who have contributed to DAO governance, and teams who have worked tirelessly to benefit the community and who's work we have forked, extended, and learned from. Additionally, the DAO sought to be as inclusive as possible and invite as many potential community members into our Discord to contribute to a movement or start one for themselves. Technical details of the Merkle distributor maybe found here. A friendly explanation of an airdrop via Merkle distributor is found here.

How are my total tokens calculated?

Tokens will be priced in accordance with a linear bonding curve.

It is possible that presale tokens will be subject to partial vesting in order to discourage pump and dump activity. Any vesting will be transparent and voted on by the community in discord beforehand.

How do I receive my purchased tokens?

- Go to our claim page
- Just hookup your wallet, pay gas, and press claim!

When do I receive my tokens?

May, 2022 (exact date TBD)

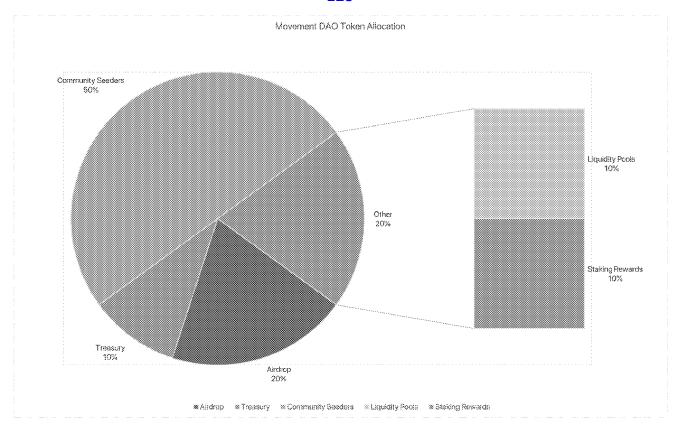

How do I know the token launch is fair?

The community will have 72 hours to audit the token airdrop list before it is released.

Token Allocation

Tokens plan to be distributed as follows:

Movement DAO controls the treasury and LP pool tokens.

The 10% of tokens dedicated to staking rewards will serve as the rewards for the first ~30 days. After this time the community will vote on how many new tokens to mint to continue rewards.

Rationale

The above is subject to change depending on the final contribution amount to the Gnosis Safe.

The final method and token computation will be shared within the Movement DAO's Discord.

The Seeder's endowment is intended to kickstart the Movement DAO. After the Community Seeding phase completes, the Gnosis Safe contributions will be computed on a linear bonding curve in order to compute the token allocation. The tokens computed will determine the total additional tokens in each of the above allocations to be minted.

Movement DAO

Snapshot Voting

(i)	Snapshot $\ensuremath{\ensuremath{\checkmark}}$ hub will be employed initially, however, our mono-repo includes a hosted off-chain
	voting adapter which is under active development.

(i)	Snapshot voting strategies during the Movement DAO will employ a governance token available
	to individuals who stake \$MOVE. However, during the bootstrapping phase of the DAO
	community contributors and based on participation will be granted a MAPE-1420 NFT which will
	be employed for initial governance. Details to follow.

Proposal format

The following is a high-level outline of what Movement governance will entail.

Standard Governance Process

Proposal should be comprehensive, specific, and easily readable. Proposals should be as brief as possible while being clear.

The following are the components which are expected to make up a proposal.

Summary. A short summary of your proposal.

Abstract. A paragraph summary. It should convey the gist of the proposal without any further reading. It should be human readable version of the specification section.

Motivation. State clearly why the proposal exists.

Risks. Implications relevant to the proposed change, relevant information includes change in any financial balances, security implications, harm to any party or property.

Specification. The rationale which fleshes out the specification by describing what motivated the design and why this particular design decisions were made. Alternate approaches, and other relevant facts to the implementation should be included here. If any consensus occurred within the community, reference to such would be appropriate. Any objections or opposition to the proposal would also be relevant to state.

Timeframe. Should include a start and end date for all actions within the proposal.

Copyright Disclaimer. All proposals must be in the public domain, and not include any profanity, or overly explicit descriptions of nudity.

Bored Ape Yacht Club No. 1420 aka "420"

The BAYC-1420 award

Movement DAO's commitment to growing our community starts with paying homage to the BAYC community. Therefore, the DAO acquired No. 1420 and the DAO will announce the terms of the Aping-in-to-Movement terms where one Movement will own this Ape. Meanwhile, the DAO has created the Movement BAYC-1420 derivative collection. Examples from the MAPE-1420 collection

Individual selection is based on past and present active contributions to DAO governance, proposals, and voting and whose social media has been used to further DAOs in any form. The airdrop isn't simply rewarding these individuals for their past contributions but also their guidance and involvement going forward. *Additional details will be released concurrent with the MAPE-1420 NFT airdrop.*

Ongoing community contribution assessment, Coordinape

The founders strongly believe in directly rewarding the community members who make Movement DAO possible. To this end, Movement DAO will be onboarding community members to Coordinape in an effort to reward community contributors. Details on which token, circle composition, and epoch schedule to be forthcoming.

Coordinape

During the bootstrap phase of Movement DAO it maybe difficult to find a rhythm in contributing to the DAO, however a few guidelines may help when it comes to your path to compensation. The previous section outlined different roles with in the community which are available.

To start collaborating, setting up a common workspace for tasks, documents, how-to, and an index of movements and parameters contemplated by the community is as good of a start as any. The following Movement DAO Notion has been set up for this purpose.

Alternatively, reaching out to a Discord moderator to including you in a Coordinape circle preferably on a topic you feel you can contribute.

Security Precautions

How has the DAO ensured its smart contracts are secure?

(1) Movement DAO is new technology, and no amount of testing or security audits completely eliminate risks. Please don't supply assets you can't afford to lose.

TLDR, at launch we are employing a Gnosis Multi-signature Safe to manage the DAO funds, Community Discord to coordinate discussions, and Snapshot (after the token distribution) for voting until the OpenLaw Tribute DAO Framework audit is complete and we have merged changes.

Slow Start

Until Movement DAO is able to operate with confidence for some time, the following safe guards were put into place until the community deems them unnecessary. The safe guards are encoded into the adapters and extension smart contracts.

- 1. Financial transactions are handled after any votes by an IRL law firm acting as a service provider.
- 2. DAO founders may elect to operate with a Vetoer role which may veto any pending proposal.
- 3. A number of Movement DAO's Gnosis Safe signers are publicly known individuals.

Smart Contract Audit

Auditors

Github user @t4sk is currently reviewing the existing repository and contracts and is providing the development team with a recommendations report. This work is specifically targeted at the adapters and extensions as they relate to the Unagi Vault, Sushi and UniSwap liquidity deployments and the bonding curve contracts. Additionally, OpenLaw (also referred to as Tribute Labs and author of the Tribute DAO Framework) are currently engaged with SigmaPrime to audit their contracts. We are closely monitoring the recommendations and updates from this audit and will merge updates as they are reported.

We have contacted SigmaPrime and notified them of our intent to hire them to do the formal audit when we are feature complete. They asked that we do not use their name on our materials until we have signed an agreement with them. We have set aside a budget to bill against when we are closer to feature complete.

Movement DAO's core premise is to enable a community by seeding it with Ethereum/DAI to create any Movement and Actions they deem worthwhile, entrusting the collective wisdom of the community and their appointed leaders to accomplish that which has remained generally opaque to the individual - charity organizations as they operate today. Movement DAO's core is a collection of smart contracts which govern managing a pool of assets on behalf of Movement and its sub-movements, the Endowment bank. Given each Movement has its own property and funds which are managed by Movement, and adapters and extensions which govern how the funds are collected, distributed, and managed are all areas which require extensive design, analysis, and audit before it is deployed on Ethereum Mainnet.

Tokens

✓ Get Tokens

\$MOVE tokens are now available for pre-sale.

Token allocation

The token allocations are computed on a bonding curve and will be snapshotted from the Gnosis multi-signature daily after May, 2022 (exact date TBD) and published in Discord. After which the Merkle root will be computed for the Merkle distributor claim.

How does the token launch work?

- 1. Tokens are released for pre-sale
- 2. Tokens will be available for pre-sale until May, 2022 (exact date TBD).
- 3. Tokens purchased during this time period will be priced on a linear bonding curve.
- 4. A final token giveaway list will be released in May for the community to review. Learn why.
- 5. Pre-sale tokens can be claimed starting in May.
- 6. Pre-sale tokens never expire. They can always be claimed.
- 7. After token claiming starts, tokens will only be available for swapping on major exchanges.

Movement DAO will ensure that there is sufficient liquidity for tokens.

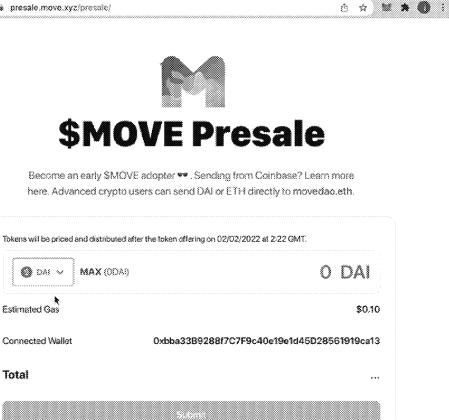

(i) The Movement DAO will conduct a "pre-sale" to qualified investors to help seed the community and identify those community members who are passionate about movements who will sponsor, lead and shape the first movements in the DAO

How do I get tokens?

First, make sure you have an Ethereum wallet setup. Two popular options are Rainbow and Metamask. Second, get those tokens.

- 1) Navigate to the token pre-sale page.
- 2) Select your base currency. You can purchase \$MOVE in ETH or DAI.
- 3) Connect your wallet.
- 4) Approve transaction in wallet.
- 5) Party

How do I send tokens from a centralized exchange (ie. Coinbase, Gemini, etc.)

Major exchanges (such as Coinbase & Gemini) do not support wallet connect and therefore cannot be used to purchase presale tokens.

These users face two options:

Option 1

- 1. Setup an Ethereum wallet
- 2. Transfer tokens to the wallet
- 3. Then simply use your new wallet

You can use any compatible Ethereum wallet.

Total

Or

- 1. Send tokens from your Coinbase account to movedao.eth
- 2. Share a screenshot of your transaction in discord
- 3. Specify the ERC-20 compatible wallet address you'd like to receive tokens

We do not recommend this method as it will add extra work for our community, and is prone to error. We recommend setting up a proper Ethereum wallet.

How are my total tokens calculated?

Token prices for tokens purchased during the pre-sale are calculated at the end of the token release. Tokens will be distributed via a Merkel Airdrop. Token prices are not calculated in real time for a few reasons:

- 1. Lower gas fees. Anyone who purchases tokens in the pre-sale will pay notably lower gas fees than those who swapped.
- Dynamically set pricing. Because exponential curves can quickly grow out of control it is important to calculate exact coefficients after-the-fact.
- 3. Most importantly, the community should have a voice in how the bonding curve is priced.

The target discount for the last bonding curve purchase to the listed LP price is ~20%.

How do I claim my tokens?

- 1) Go to the claim token page
- 2) Connect your wallet (for twitter connect see here)
- 3) Pay gas fees and claim token

How do I know the token launch is fair?

Movement DAO cares deeply about building healthy communities. Therefore, an ethical token release is core to our mission. Movement DAO is taking the following steps to ensure a transparent, equitable, and community oriented launch:

- 1. When transferring tokens from the bonding curve wallet into the movement vault, the community has the right to veto the destination address. Therefore, community funds cannot be moved without community approval.
- A registered law firm acts as a signatory on the funds wallet. They therefore owe a fiduciary duty to
 the movement and will employ their expertise to ensure that no funds are moved in violation of
 the movement rules and no requests for funding would be indicative of fraudulent activity.
- 3. Tokens will not be distributed without community approval. The community will have 72 hours to review the Merkel airdrop list.
- 4. Funds raised from the movement bonding curve go into an endowment as opposed to a liquid spending pool. This endowment helps to preserve long term funding for the project.

Community Funding

Community, Community, Community

Overview

The founders strongly believe in directly rewarding the community members who make Movement DAO possible.

Movement DAO will choose the most impactful Movement DAO community members to receive a steady salary in tokens for supporting Movement DAO.

For the first 18 months of the project, at the end of every month, the community will vote on who had the biggest impact. Movement DAO will use Coordinape to facilitate this community giveaway.

Movement DAO has earmarked 5% of tokens for the community and will distribute over \$1,000,000 in tokens over the first year directly for community contributions.

Staking

The Movement DAO is currently allocating a percentage of its treasury for staking rewards. It is currently planned that at the time of the token claim, users will have to option to stake immediately.

Only staked \$MOVE holders will be able to participate in Snapshot governance.

Liquidity Pools

Shortly after the Airdrop via Merkle distributor for \$MOVE and deployment of the staking contract, Movement DAO has allocated a portion of its treasury for liquidity pools to earn fees as well as provide liquidity for the community. The exact amount, as well as which DEX to use will be decided via the DAO governance process.

Community

Vision

The Vision

Today, society is increasingly demanding engagement, transparency, expediency and a seat at the table when solving problems. Our vision is for Movement DAO to become the platform that humanity turns to to make the most meaningful impact in the world.

Movement Ideas

Social Justice

Movements like Black Lives Matter have been profoundly effective at organizing large groups to promote real change. However, because BLM is exceedingly decentralized, the community had poor tools to effectively raise money. BLM can use Movement DAO to:

- 1. Organize the community with leaders.
- 2. Raise money in a way that financially aligns supporters.
- 3. Transparently spend money through initiatives.

The 2017 Women's March faced similar challenges. With Movement DAO however, future movements could use an endowment model to transform a tidal wave of excitement over a short perif time into long lasting & sustained funding.

The next wave of social justice movements should organize & raise capital on Movement DAO.

Public Arts

The public arts are often neglected by local governments. When projects are created, they are bogged down by bureaucracy and often highly political. Rarely do they represent the whims of the people.

Movement DAO enables a small & passionate community to create truly eye catching public art.

Imagine a DAO funded dog park (DOAG park) on the water in South Beach. This dog park could feature a 20ft tall DOGE head and be prominently featured with the DAO's token symbol (hopefully \$DOAG).

Movement DAO is well equipped to promote public arts.

Prison Reform

Projects like Free Ross DAO serve as an inspiration for the impact that DAOs can have. Future movements that fight for prison reform can use the tools on Movement DAO to take their communities further.

Controversial Research

Today the process to receive grants for research at top academic institutions is highly politicized & bureaucratic. Often good ideas are left unfunded if they attack the status quo. A movement to democratize independent research could push science forward. Leaders

Union Movement

Union workers organize to support a common goal and often pay dues to support their efforts. However, unions are can be plauged with corruption and don't always represent the will of their members.

Unions could organize as a movement, with due's being paid to the movement itself.

Union members can elect leaders and have transparency into how all money is spent.

Environmental Cleanup (Save Sea Turtles)

Everyone loves sea turtles. And everyone hates plastic. Start a movement to save our environment!

Mission

Society already has the collective compassion, knowledge and resources to solve the world's problems. The missing piece is a technology to bring it all together. Movement DAO uses proven applications of blockchain to align economic incentives within communities and empower them to solve problems as a collective.

Movement DAO's mission is to change the world for the better and become the launchpad for the world's most impactful movements!

Movement DAO enables communities to run programmable and community funded treasuries by providing tooling and a seeded endowment.

Building Community

Values

We are stewards. We respect with humility the opportunity to help build on the open internet together, and are dedicated to using our capabilities for good.

We are self-starters. The decision to make the world a better place doesn't start with expecting someone else to solve a problem. We have to prioritize this for ourselves and enable those around us.

We are focused. We have been entrusted with a large sum of capital by our community. We must be focused on how to efficiently and effectively use these resources to drive towards our goals. This means balancing short-term benefits to our community with longer-term impact to the global community.

We are builders. The company we keep are individuals who prioritize building, and do so with pride. We build with humility and to make the world a better place.

We are honest. With each other and most of all, to ourselves. We share ideas, feelings, concerns and exchange everything in between openly and respectfully to each other.

Movement DAO Community

Movement DAO is designed for expression, empowerment, and engagement. We are keenly focused on empowering communities and encouraging them to consider this powerful new way of solving problems. The Movement DAO creators share the passion and compassion of each of its movement communities and have built an environment dedicated to their collaboration and harmonizing around movements.

Leadership

Movement Leaders provide an opportunity for movements to increase momentum. Leaders are compensated by movements on a regular basis for promoting the movement to the world. Movement communities will elect these leaders (who are likely individuals with large social followings already) upon the minting of new movements. Leaders are compensated in Movement Tokens that are unlocked if they adequately fulfill the community's goals. Leader's responsibilities can include promoting their movements, engaging communities, and fostering a collaborative ethos. Initiatives – Initiatives are projects proposed by the movement community. Token holders vote on which initiatives receive funding. Funding is provided by the reserve pool & direct tributes. Funding is distributed incrementally when predetermined milestones are achieved. Initiatives are proposed with those milestones. Funding Initiatives - Each movement is its own DAO that accumulates reserves over time to fund initiatives. Reserves are funded by a variety of "tribute" (activity based contribution) mechanisms specified by their communities. These can include: Transaction tributes associated with the minting and burning of movement tokens Tributes from selling vested tokens early Direct tributes to initiatives through staking (with boosted voting rights)

Movements are designed to become sustainable communities with continuous funding. However, movements cannot sustain without leadership, coordination and engagement. Below are some key considerations for how communities remain healthy and impactful.

TOKEN GIVEAWAYS

Movement DAO & its Movements can use giveaways to strategically bring new people into their ecosystem. A giveaway has three key phases: The community selects a strategic person who should be financially aligned with the movement. They identify this person via their Twitter account. They decide how many coins to give this person. The individual can then claim up to half their coins. In order to claim tokens they need to nominate via twitter two or more people. The other half of their coins are then distributed to whoever they nominated. A flywheel persists of people claiming coins and nominating other people until the gas fees to claim coins are higher than the value of the coins. After a set amount of time unclaimed coins will go back to the endowment. Communities can also decide to lock their coins or vest their coins in giveaways. Locked coins can't be sold for a set amount of time. Vested coins incur a tribute on early sale.

(1) All members should review and adopt Movement DAO community pledge.

Charities

Movement DAO works in harmony with charitable organizations in a variety of ways.

- Charities launching movements Charities may decide to launch their own movements to raise money and procure help in this new and exciting way! Charities can be the recipient of funds through this platform and can offer tokens or NFTs to its community as a reward. Instead of offering t-shirts and prizes like many non-profits do, they can now offer a reward system to incentivize recurring donations from their community (similar to airline miles).
- Charities as direct investors Organizations such as Foundations and Endowments can elect a
 portion of their investment portfolios to directly invest in Movement Tokens. Instead of their investment
 portfolios having passive allocations to ESG stocks, they become active voting members of the
 community.
- Charities as beneficiaries Charities that join Movement communities can earn token awards from Movement Evangelists by offering their time and expertise in Movement communities

© Community Pledge

At Movement DAO, our collective success relies on our ability to work together in harmony. We ask that all community members adhere to our eightfold pledge for building and maintaining communities in the right way.

- Right view Right view means that community members are aligned in their values and goals for global impact. Each community will become the product of our collective spirit, optimism and hard work in developing sustainable communities for positive impact.
- 2. Right intention This platform is designed for real world impact. While other blockchain projects are designed for boosting economic status, we are here to turn this economic potential into changing the world. While the potential for comping EARNING is substantial, community members should consider this platform as a means to compound GIVING.
- 3. **Right speech** Unlike social media platforms that are plagued with divisiveness and inflammatory discourse, this platform is designed for people to mobilize, collaborate and make impact together. We have no time to waste with distractions like divisive speech, abuse, or unrelated chatter.
- 4. Right action Community members should be fully aligned with their intentions in both the physical world and the digital world. Community members should not use this platform to influence or manipulate the real world in a malignant way. Everyone should feel safe to express their opinions and contributions free from any malicious reaction. The community should engage in non-violent communication and conflict resolution. The community must build and maintain a level of trust by quickly highlighting any instances of fraudulent or malicious activity.
- 5. **Right livelihood** It is possible for community members to grow their earn and make impact. There are several other platforms for those seeking lambos. We ask that community members don't let their earning potential detract from their giving potential.
- 6. **Right effort** Each community member has a duty to prevent, mitigate, and resolve conflict on the platform.
- 7. **Right mindfulness** Mindfulness means that community members are consciously aware of their own biases, preconceptions, and judgements. These tendencies can become blockages of new information and can lead to further misunderstanding and miscommunication. Community members should listen to others completely and practice mindful non-violent communication.
- 8. **Right concentration** Community members should dedicate time to tasks within their communities instead of trying to multi-task. Problem solving is a dedicated effort and the communities need your focused wisdom and effort.

Developers

DevCommunity

Development of the Movement DAO has occurred primarily following fronts

- Feature specific smart contract and Typescript stand-alone cli application
- Implemented as part of the Tribute Labs DAO Framework

The system requirements spanning on-boarding a community with tokens, an interface for governance, and the range of adapters contemplated for communities is expansive. Complicating matters is the constant evolution of tooling and deployment options. Nonetheless, our goal is to enable individuals and communities with the best tools to bootstrap their treasury and follow through until they have a token with liquidity.

To that end we have partnered when possible with existing Open Source teams and contributed code to extend the development experience.

Movement DAO is actively looking to work with talented web3 developers who are excited to revolutionize how communities manage their treasuries!

All developer coordination happens on our Discord – we recommend connecting directly with the community driven development team there.

Join our discord to get started!

Audits

The Movement DAO smart contracts have been reviewed by Tasuku Nakamura, the blockchain engineer behind Unagii Vault.

Github

What Github Repositories does Movement DAO use?

The Movement DAO benefited from the thousands of hours of open source work from a number of communities. To that end, the team reviewed a number of existing successful Open Source projects in order to extend the features which were important in furthering the community endowment model.

Forking

"Forking is the highest form of flattery," said @tankbottoms.

Juicebox, has the most thoughtful community defined programmable funded treasury which is enjoying success with the Shark DAO and Constitution DAO from the funding to raw awareness. Relatively short amount of time since launch, JBX-Protocol has a significant treasury and tremendous success with the community. But we think it could do more.

Additionally, the Tribute Labs team behind Tribute DAO Framework, formerly Open Law "have deployed nearly ten DAOs (with one or two coming every month) together have over \$150m and have supported over 150 projects". Source. We saw TributeLab's DAO Framework as game changing and sought to expand the universe of adapters and extensions on their platform.

Movement DAO cares deeply in making our UX an engaging and intuitive. Combining each of the above mechanics, protocols in an easy to convey manner is hard. We think hard means it's worth working towards.

Movement DAO added a number of adapters and extensions relating to the management of movements and the treasuries the communities funded. The following Movement DAO Github Organization is where we invite capable developer contributors to seek us out, or in the Discord developer channels.

- 1. Movement DAO
- 2. JuiceBox
- 3. OpenLaw Tribute Contracts
- 4. OpenLaw Snapshot Hub
- 5. Twitter OAuth
- 6. Unagii-Vault-v2
- 7. Uniswap's Sybil-list, Sybil-interface

Solution

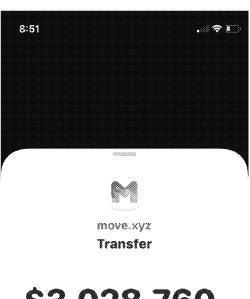

We think the solution is not a developer focused application or SDK, but reduces the barrier to entry.

Known Bugs

(i) Wallet Connect Bug

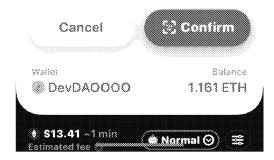

When a wallet is connected via Wallet Connect and has a DAI transaction that transaction may appear denominated in ETH.

For example, assume you want to purchase 1000 DAI worth of \$MOVE. The transaction in your wallet will confirm if you're ready to transfer 1000 ETH, otherwise 3.0 million worth of ETH. This transaction will be approved, because Wallet Connect is still processing it as a DAI transaction.

What smart contracts have been deployed to date?

(1) While we have developed within the Tribute DAO Framework, and deployed on Rinkeby and Mainnet, we are not yet active within this framework for a number of reasons including waiting for the conclusion of the current Tribute-contracts security audit.

Below you will find each of the contract addresses under their respective network. The contracts were also verified on Etherscan. A log of the deployment and the verification is also provided.

Rinkeby

The following DAO contract addresses are provided for development and test interaction purposes. Active development is currently underway to widen the types of token voting and staking economics we would like to support. Deployment and verification log.

Verification process completed with success

Security

How has the DAO ensured its smart contracts are secure?

① Movement DAO is new technology, and no amount of testing or security audits completely eliminate risks. Please don't supply assets you can't afford to lose.

TLDR, at launch we are employing a Gnosis Multi-signature Safe to manage the DAO funds, Community Discord to coordinate discussions, and Snapshot, after the token distribution, for voting until the OpenLaw Tribute audit is complete.

Slow Start

Until Movement DAO is able to operate with confidence for some time, the following safe guards were put into place until the community deems them unnecessary. The safe guards are encoded into the adapters and extension smart contracts.

- 1. Financial transactions are handled after any votes by a IRL law firm acting as a service provider.
- 2. DAO founders may elect to operate with a Vetoer role which may veto any pending proposal.
- 3. A number of Movement DAO's Gnosis Safe signers are publicly known individuals.

Vetoer

Until Movement DAO is able to operate with confidence for some time, the following safe guards were put into place until the community deems them unnecessary. The safe guards are encoded into the adapters and extension smart contracts.

- 1. Financial transactions are handled after any votes by a IRL law firm acting as a service provider.
- 2. DAO founders may elect to operate with a Vetoer role which may veto any pending proposal.
- 3. A number of Movement DAO's Gnosis Safe signers are publicly known individuals.

Smart Contract Audit

Auditors

Mr. T. N. or @t4sk is currently reviewing the existing repository and contracts and providing the development team with a recommendations report. This work is specifically targeted at the adapters and extensions as they relate to the Unaqi Vault, Sushi and UniSwap liquidity deployments and the bonding curve contracts.

Also underway OpenLaw themselves have engaged SigmaPrime to audit the Tribute contracts. We have contacted SigmaPrime and notified them of our intent to hire them to do the formal audit when we are feature complete. They asked that we do not use their name on our materials until we have signed an agreement with them. We have set aside a budget to bill against when we are closer to feature complete.

Scope

Movement DAO's core premise is to enabling a community by seeding it with multiple-millions of Ethereum to create any Movement and Actions they deem worthwhile, entrusting the collective wisdom of the community and their appointed leaders to accomplish that which has remained generally opaque to the individual - charity organizations as they operate today.

Movement DAO's core is a collection of smart contracts which govern managing a pool of assets on behalf of Movement and its sub-movements, the Endowment bank. Given each Movement has its own property and funds which are managed by Movement, and adapters and extensions which govern how the funds are collected, distributed, and managed are all areas which require extensive design, analysis, and audit before it is employed on Ethereum Mainnet.

Yield Farming

Learn How the EnDAOment makes money

Yield Farming is a DeFi earning strategy used to optimize the earning potential of blockchain-based assets. Yield farming strategies can consist of:

- Staking
- Lending
- Liquidity pools

Unagi Vault

Unagii connects to third-party underlying Ethereum DeFi protocols that earn users high-yields on their crypto asset deposits. The Vaults optimizes yield on incentives earned from providing liquidity to AMMs (automated market makers) and lending pools, and automating the harvesting of LP (Liquidity Provisioning) rewards on a bank of whitelisted Strategies. This allows the Vaults to perform efficiently to provide gas cost-savings on Ethereum network gas fees to users and for Unagii to offer one of the lowest fees in the market.

Currently, Unagii Vaults yield on the Compound Finance and Convex Finance (utilizing Curve Finance as the underlying pool) protocol. We will include additional strategies with other protocols in the future.

Understanding Vaults

Unagii Vaults has two category groups - Stash and Growth, where users can choose to yield and diversify their assets based on their risk appetite. The Unagii smart contract is designed to allow users to deposit and withdraw the same asset freely at any time.

The Vaults pools users' deposits and automatically invests the pooled assets into a Vault's set Strategy. It then auto-harvests liquidity rewards and sells them into the asset with the highest premium, compounding periodically.

The Vaults product was created to offer high-performing yields in the most efficient and optimized way possible as the DeFi market continues to explode. Unagii is set to serve amidst the rising complexities of yield opportunities so even retail crypto users have a trusted way to participate in DeFi without worrying about contributing time, effort, cost, and the technical knowledge to monitor and implement yield farming strategies themselves.

Stash Vaults

Caa6ase23323-29620727727RAKADD00cwrent12061ErHeterdown Es515000docke3/93/2023020age3924 602246 653

Stash Vaults offers users an excellent way to yield on stablecoins such as DAI, USDC and USDT, earning the highest yields on the best performing stable pools in the market.

Risks here have been abstracted down to stablecoin issuer risks, third-party protocol risks i.e. Compound Finance and Curve Finance (plus any associated platforms included in the strategy), and Unagii Vaults protocol risks.

Growth Vaults

Growth Vaults is where we offer opportunities for users to go for growth on non-stable crypto assets like ETH and WBTC. These Vaults yield on alpha strategies that come with greater risks but much higher potential returns.

() Please understand the risks involved in depositing funds in smart contracts and read our audit to learn how the Vaults smart contracts are designed to mitigate those risks.

How to use Vaults?

Deposits

Users can easily start earning yield by depositing their crypto assets into the Vaults. Once a user has connected their Ethereum wallet, a deposit takes 3 simple steps:

- 1. Select asset to deposit
- 2. Enter amount to deposit
- 3. Choose gas fee option (slow, standard, fast) to approve and confirm deposit (ETH gas fee payable)

No additional steps required to further stake any tokens to boost yields. The Vaults automates the harvesting and selling of liquidity reward tokens earned in strategy, giving users complete convenience and optimized yields.

Withdrawals

When a user decides to remove their assets from the Vaults, a withdrawal takes 3 simple steps:

- 1. Select asset to withdraw
- 2. Enter amount to withdraw
- 3. Choose gas fee option (slow, standard, fast) to confirm withdrawal (ETH gas fee payable)

Withdrawals can be done anytime. There is no lock in period, but do take note of the ETH gas fee payable relative to the size of your deposits and earnings.

(i) Bonus

In some instances under a Convex or Curve Finance strategy, deposits/withdrawals may receive some bonus that will be reflected in a user's balance. Bonuses occur when depositing/withdrawing assets with a price premium and/or for an asset with the lowest share to help rebalance a strategy's liquidity pool.

(!) Slippage

Deposits/withdrawals from Convex or Curve Finance strategies may be subjected to some slippage that will be reflected in a user's balance. Slippage occurs from any price volatility and from disrupting a strategy's liquidity pool balance with assets that are less valuable (relative to the pool's other assets).

For deposits, it is recommended to leave your funds in the Vaults for a few days to offset any slippage.

Fees and Gas Cost-Savings

Unagii as a platform has one of the lowest fee model:

Deposit Fee	Withdrawal Fee	Management Fee	Performance Fee
None - 0%	None - 0%	None - 0%	10% (deducted from earnings)

Unagii reserves the right to amend the fees at any point of time. Users will be notified of any fee changes at least one month prior to changes taking effect.

Unlike Unagii, many other aggregators and DeFi robo-advisors often alienate the average retail yield seeker with high fees at every touchpoint, in addition to gas fees users have to incur (which can be an exorbitant amount during peak congestions on the Ethereum network).

Gas Fees

Gas fees are payable by the user and is required for transactions by any DeFi product on the Ethereum network. The speed or amount of Gwei used affects the price of the payable gas fee and how long a transaction will take to confirm.

Higher Gwei = Higher ETH payable = Faster transaction speed

(i) Users will need to ensure they have sufficient ETH in their wallet to pay for gas fees upon approval of permission for Unagii smart contract use, upon confirmation of a deposit, and on confirmation of a withdrawal.

Gas Cost-Savings

Unagii Vaults helps users with gas cost-savings, especially for heavy DeFi yield farmers and new users curious about liquidity mining. Unagii users will save on not needing to make costly daily transactions to stake, claim, and compound their earnings - that's at least 3 transactions saved over 3 days basis.

i Yield farming directly with a DeFi protocol may require users to manually stake their pool tokens received (that represent their share of ownership in the pool) to mine for governance tokens. For some, users acquire pool tokens on one platform, then harvest on another aggregator. They can then sell off the governance tokens, participate in the DAO, or further boost rewards by locking up the asset (e.g. in the case of CRV vote locking with Curve).

Unagii Vaults helps to automate this yield farming process, providing users with convenience and much needed gas cost-savings.

StrategiesUnagii executes curated Strategies by pooling deposits and supplying liquidity for each Stash and Growth vault into the protocols. All strategies are audited before fund deployment.

Compound Finance

Compound Finance is the very first lending and borrowing protocol that was launched in September 2018, allowing anyone to earn interest on or borrow crypto assets without a peer. Each lending market has a dynamic borrowing interest rate, which varies as market conditions adjust.

How is yield earned on Unagii?

- 1. 1.Users' deposits are pooled in the Vaults
- 2. 2.In return, users receive uTokens which represent a claim on their share of deposits with any accrued yield earned over time
- 3. 3.Pooled assets are auto-deposited into the Compound strategy lending markets several times a day
- 4. 4.Using the deposits as collateral, the same asset is borrowed and lent out several times to lever up on the \$COMP emission yields
- 5. 5.\$COMP earned from lending and borrowing will automatically be sold into the native Vault asset once every 3 days

Stash Vaults

• V1 USDC Vault and V2 USDC Vault - Compound Leveraged strategy \$USDC is a stablecoin issued by regulated financial institutions, backed by fully reserved assets, redeemable on a 1:1 basis for US

Caa6ase23323-29620727727RAKADD00cwrent12061ErHeterdown Es515000docioei/03/04/2023020age392465246

dollars, and governed by Centre, a membership-based consortium that sets technical, policy and financial standards for stablecoins. The Compound Leveraged strategy lends out \$USDC to Compound Finance, and borrows back \$USDC at a safe LTV (loan to value) ratio. This is repeated a few times to lever up the \$COMP incentives that are emitted when users lend and borrow assets on Compound Finance. The \$COMP tokens are automatically harvested and sold back to \$USDC to compound yields. Using the same underlying asset for both lending and borrowing removes oracle pricing risks from the strategy.

• V1 DAI Vault - Compound Leveraged strategy \$DAI is the native stablecoin issued from MakerDao, a decentralized protocol that allows you to mint the \$DAI stablecoin using a variety of whitelisted tokens as collateral. The Compound Leveraged strategy lends out \$DAI to Compound Finance, and borrows back \$DAI at a safe LTV (loan to value) ratio. This is repeated a few times to lever up the \$COMP incentives that are emitted when users lend and borrow assets on Compound Finance. The \$COMP tokens are automatically harvested and sold back to \$DAI to compound yields. Using the same underlying asset for both lending and borrowing removes oracle pricing risks from the strategy.

Curve Finance

Curve Finance is one of the earliest automated market maker (AMM), a type of decentralized exchange protocol in the market. It was launched in early January 2020. Curve operates as an exchange liquidity pool on Ethereum designed for (1) efficient stablecoin and crypto asset trading with extremely low slippage (2) low risk, supplemental fee income for liquidity providers, without an opportunity cost.

Enhancing yield with Convex Finance

Convex allows liquidity providers on Curve to earn trading fees and claim boosted \$CRV without locking \$CRV themselves. Liquidity providers can receive boosted \$CRV and liquidity mining rewards with minimal effort. On top of earning \$CRV, liquidity providers also receive liquidity mining rewards in the form of \$CVX, hence boosting the yield for Unagii users.

How is yield earned on Unagii?

- 1. 1.Users' deposits are pooled in the Vaults
- 2. 2.In return, users receive uTokens which represent a claim on their share of deposits with any accrued yield earned over time
- 3. 3. Pooled assets are auto-deposited into the Curve strategy liquidity pool several times a day
- 4. 4.LP (liquidity provider) tokens are received in return and auto-staked into the Convex staking pool (or Curve staking pool for V1 vaults)
- 5. 5.\$CRV (and \$CVX and any other incentive tokens) earned from staking will automatically be sold into the highest premium asset once every 3 days

Stash Vaults

• V1 USDT Vault - Curve USDP Metapool strategy \$USDP is the native stablecoin issued from Unit protocol, a decentralized protocol that allows you to mint the stablecoin \$USDP using a variety of whitelisted tokens as collateral. Providing liquidity to the \$USDP Curve pool will allow Unagii users to

earn trading fees from trades on Curve and \$CRV incentives via staking of the LP tokens. Rewards will be sold into the most premium Stablecoin and compounded.

• V2 USDT Vault and V2 DAI Vault - Convex alUSD Metapool strategy \$alUSD is the synthetic stablecoin issued from Alchemix, a future-yield-backed synthetic asset platform that gives you advances on your yield farming via a synthetic token that represents a fungible claim on any underlying collateral in the Alchemix protocol. For more information on how Alchemix works, kindly visit their documentation. Providing liquidity to the \$alUSD Convex pool will allow Unagii users to earn trading fees from trades on Curve, as well as \$CRV, \$CVX and \$ALCX incentives via staking of the LP tokens. Rewards will be sold into the most premium Stablecoin and compounded.

Growth Vaults

- V1 WBTC Vault Curve oBTC Metapool strategy This Metapool helps further increase the liquidity of Bitcoin on Ethereum and makes it easier for users to swap between different variants of wrapped \$BTC. \$oBTC is backed by \$BTC and created by BoringDAO a decentralized bridge that allows users to transfer assets across blockchains via a minting tunnel. After Unagii deposits pooled assets in the strategy pool, we'll receive our share of LP tokens which will be staked for \$CRV and \$BOR in the DAO liquidity gauge. We'll then claim them from the minter gauge and sell them down to the most premium wrapped \$BTC compound the earnings. Providing liquidity into this pool will also accrue trading fees from Curve users on the exchange of four different kinds of pegged-BTC tokens (including \$oBTC) with low slippage.
- V1 WBTC Vault Curve BBTC Metapool strategy Binance Wrapped BTC is an ERC20 version of BTC that is issued by Binance as part of their BTokens offering. Deposits will be pooled in the strategy pool, where we'll receive our share of LP tokens which will be staked for \$CRV in the DAO liquidity gauge. We'll then claim them from the minter gauge and sell them down to the most premium wrapped \$BTC and compound the earnings. Providing liquidity into this pool will also accrue trading fees from Curve users on the exchange of four different kinds of pegged-BTC tokens (including \$BBTC) with low slippage.
- V2 WBTC Vault Convex BBTC Metapool strategy Essentially the same as V1 WBTC Vault Curve BBTC Metapool strategy, but with LP tokens staked into Convex pool instead to earn \$CVX on top of \$CRV.
- V1 ETH Vault Curve stETH pool strategy This pool helps make staked \$ETH 2.0 more liquid, so users can retain exposure and earn rewards. \$stETH is a tokenised form of staked Ether native to Lido Finance a staking solution for \$ETH 2.0 built and backed by several industry-leading staking providers. By providing liquidity to this pool on behalf of Unagii users, Unagii will earn trading fees from Curve exchange transactions that take place within this pool. On top of that, we'll also receive LP tokens in return which we'll stake into the Curve gauge to receive \$LDO and \$CRV incentivized rewards. These rewards will then be sold into the most premium Ether and compounded. Users will be able to withdraw from the vault anytime in \$ETH or \$stETH.
- V2 ETH Vault Convex stETH pool strategy Essentially the same as V1 ETH Vault Curve stETH
 pool strategy, but with LP tokens staked into Convex pool instead to earn \$CVX on top of \$CRV and
 \$LDO.

Unagii Vaults V1 is an Ethereum-based protocol that enables users to passively earn from automated yield farming by depositing single crypto assets into the Vaults executing a specific Strategy in a gas-efficient environment. V2 Vaults

Unagii Vaults V2 is the next iteration of the protocol with a slightly different architecture:

- Vaults are upgradable by default as the Unagii Token contracts and the Vault contracts are separated,
 making it similar in design with Curve token and Curve pool contract
- Smart contracts can interact (deposit/withdraw) from the vaults, which allows any developer to integrate with Unagii Vaults V2 (there is a block delay)
- Vaults are protected from flash loan attacks as Unagii token tracks the lastest block number of the caller
- Protected from sandwich attack on harvest as profit is vested over a period of time (6 hours for now)
- Vaults are able to invest in multiple strategies, allowing the protocol to maximize returns by optimizing the allocation of funds to each strategy

△ Understanding the Risks

All users should first understand the risks associated with blockchain, DeFi and Smart Contracts

Since every protocol or application is built with smart contracts interacting with one another in some form, smart contract failure in one of the core components could cause a ripple effect throughout the DeFi ecosystem.

This means that smart contract failure on the lower layers could lead to loss of funds in the protocols or applications that are built at the higher layers.

Mitigating Smart Contract Risks through Multiple Security Audits

These smart contracts have been put through multiple security audits like the Compound Protocol from reputable firms like Trail of Bits.

Risks with Stablecoin Pegs

Δ

Failure to maintain its desired peg could lead to loss of funds for Stablecoin holders

Stablecoins are designed to minimize price volatility relative to another asset by pegging to another currency (fiat, crypto) or commodity.

Stablecoins can fail due to collateralization and volatility risk together with flawed mechanism designs to maintain their respective pegs.

However, the main risks are associated with specific collateral types backing these stablecoins. Overcollateralization can help to reduce volatility risk but if the prices of the underlying collateralized asset drops too quickly, liquidation might not be enough to cover the full amount that was borrowed.

That being said, the risks are greatly reduced with a reasonable collateralization ratio and sound collateral types that have a monetary premium and deep liquidity like Ether or Bitcoin.

Losing a desired peg could cause loss of funds for stablecoin holders and that is why at Unagii we have decided only to work with the best, time-tested and widely accepted stablecoins like USDC (which is 1:1 backed by US dollars in a bank account issued by Coinbase) and DAI (decentralized crypto-overcollateralized stablecoin)

Market Risks

Caa6ase23323-29172217-27RIAKADDD0commentE2261ErHEterendomE552152Dookset033/93/202302193093599 900246 653

As with all new markets and technologies, other complex risks could exist with new Financial Platforms like Compound. One of these complex risks is Market Risk and better financial models are needed to better analyze these risks.

Platforms like Gauntlet have done thorough Risk Assessments like the one here: https://gauntlet.network/reports/CompoundMarketRiskAssessment.pdf

We use a rigorous definition of market risks to construct simulation-based stress tests that evaluate the economic security of the Compound protocol as it scales to underwriting billions of dollars of borrowed assets. These stress tests are trained on historical data and put through a battery of scenarios that represent the expected and worst case economic outcomes for the protocol. Our stress tests are constructed analogously to how transaction-level backtesting is done in high-frequency and algorithmic trading. These techniques are used to estimate the market risk of a systematic trading strategy before it is deployed to the market. As there are over \$1 trillion US dollars of assets managed by funds that use these techniques to provide daily actuarial analyses to risk managers, we believe that these are the best methodologies for evaluating market risk. By modifying these techniques to handle the idiosyncrasies of cryptocurrencies, we are able to provide similar statistical power in these actuarial analyses

o FAQ

Why does the world need this?

We believe that society already has the collective compassion, knowledge and resources to solve all of the world's problems. We also know that the missing piece is a technology to bring it all together. Therefore we use proven applications of blockchain to connect the people within existing communities and empower them to solve problems together. With this project, we envision a world enDAOment that can provide continuous funding to the movements and initiatives that matter most to the community.

Our vision for the future

In the future, we believe people will demand engagement, transparency, expediency and collaboration in society, and a seat at the table when solving problems. We believe this platform will be what people turn to first when looking to start and fund movements.

What is a DAO? And why do we need it?

A DAO is an online community built on the blockchain that introduces powerful tools designed for collaboration, decentralization, and transparency without the need for trust. This combination allows us to quickly mobilize around our most important social movements and take action quickly.

What is a "Movement"?

Movement DAO supports movements, defined as communities organized around a shared mission. For example, social movements such as racial justice, environmental movements such as saving endangered species, or public goods movements such as art projects. For the first time ever, these movements have the infrastructure to finance their causes with economic alignment. For the first time ever, the infrastructure exists to prevent tragedy of the commons.

What is an "initiative"?

Initiatives are projects proposed by the movement community. Token holders vote on which initiatives receive funding. Funding is provided by the reserve pool & direct tributes. Funding is distributed incrementally when predetermined milestones are achieved. Initiatives are proposed with those milestones.

What are the differences between \$MOVE and \$(Movement) tokens?

MOVE tokens represent the potential to mint new movements and influence how the entire system is governed. In addition, the MOVE token is the native currency used to purchase movement tokens. Given this powerful utility and the inherent demand for \$MOVE tokens, this token has the potential to appreciate in value over time as the ecosystem grows. The \$MOVE ecosystem also earns movement tokens for each newly minted movement and revenue generated through network activity tributes. Revenue generated through network tribute goes towards the MOVE enDAOment.

What is a Defi Endowment?

The Defi Endowment is a pool of tokens (both \$MOVE and \$(Movement) tokens) that are owned by the governance DAO. This pool of assets is used to permanently generate income for funding movements and their initiatives. Income is generated through network activity related to trading and swapping of tokens, as well as yield farming of stablecoin assets.

What are the benefits for token holders?

Movement tokens have the potential to accrue value over time, as the price is directly tied to the growth of a movement community. Movement communities have the flexibility to set their own economic design including variables such as bonding curves, transaction tributes, vesting, and deflation. Movement tokens also represent voting rights for governance and funding initiatives. Like \$MOVE token holders, \$(Movement) token holders are incentivized to take action against malicious actors in their communities.

How are tokens distributed?

Both \$MOVE and \$(Movement) tokens are distributed via a mechanism called a bonding curve. A bonding curve is an encoded formula that determines the price of each incremental token that is minted (purchased) or burned (sold) based on the total supply. Instead of minting a large supply of tokens at the onset of the project, Movement DAO uses this minting and burning mechanism so that these communities are formed, grow and thrive as decentralized communities from the beginning. The bonding curve is not only ideal for ensuring decentralization, fairness, and stability, it is also an important element used for continuous funding for movements.

How are initiatives funded?

There are two primary forms of funding for initiatives: Passive and Active. •Passive funding occurs when the movement community uses treasury reserves to fund initiatives. Passive funding takes time and requires continuous growth and activity such as minting, burning, and swapping of tokens. Active funding occurs when community members apply tributes to their votes. Tribute votes combine the signaling of which initiatives the voter wants to fund, and also attaches direct tributes of tokens IF those initiatives are selected. Those who tribute tokens earn a boost in their voting power.

Why should I trust this platform?

The Merkaba system is built in a way that designs bad behavior out of the system by using carefully designed incentive systems. First, the use of bonding curve token distribution ensures that the project will be decentralized and community owned from the beginning. The founders tokens will be locked for # years from launch, meaning there is no return on investment to the founders until the platform is fully built, operational and successful in its objectives. The system also establishes trust with its community by adopting state of the art mechanism design concepts. We have built this system on the shoulders of giants. Users can rest assured that the underlying code has been audited for functionality and security.

What are my responsibilities as a community member?

Caa6ase23323-29620727727RAKADD00cwrent12061ErHeterdown Es515000docke3/93/2023020age39291246 653

There are various stakeholders and community members in the Movement DAO ecosystem. The primary stakeholders are \$MOVE token holders and movement token holders.

- 1. \$MOVE tokens represent voting rights on the platform. Token holders are able to submit proposals and vote for governance changes as well as launch and influence new movements on the platform.
- 2. \$(Movement) tokens represent unique ecosystems designed specifically for supporting movements.

 Movement token holders are responsible for promoting, collaborating, and voting on how resources are allocated, and to which movement initiatives.

How do I get involved in the community?

- 1. As a movement evangelist Submit a proposal for a new movement or get involved in a new movement community. Movement evangelists are often those who are proposing new movements, however communities may find more influential leaders that can grow their communities better over time. Additionally, evangelists can choose to have delegates who they allocate a portion of their rewards to increase the scope of the network and its influence.
- 2. **As a developer** Join our Discord and stay active within the Developer channel. We encourage a collaborative developer community to help make the platform the best it can be.
- 3. As a community organizer Decentralized communities require community members that take on leadership roles to help organize and mobilize their respective communities to take action and work together. Communities will naturally identify skillful leaders and create incentives to keep them engaged in these important roles.

How do I purchase tokens?

- Download the Metamask wallet extension for your browser at https://metamask.ioand follow details instructions at https://metamask.io/faqs.html
- 2. Download the Metamask App for your mobile device
- 3. Sync both applications with the QR code provided, Add funds with a debit card or Apple Pay
- 4. Complete your first transaction by buying ETH
- 5. Link your Metamask wallet to Movement DAO and buy \$MOVE
- 6. Use your \$MOVE tokens to start a new movement or to buy existing movement tokens.

Glossary

Use this space to get up to speed on key terminology

AUDIT

An audit is a comprehensive review of a system and its design to identify its strengths, weaknesses and potential vulnerability. Audits may be internal or independent and can be informal or formal audits and are meant to be a tool for project stakeholders or developers.

APY

Annual Percentage Yield are a time-based measurement of the Return On Investment (ROI) on an asset. For example, \$100 invested at 5% APY would yield \$105 after one year, if there is no compounding of any interest earned on that \$100 through the year.

AMM

An AMM is a decentralized asset trading pool that enables market participants to buy or sell cryptocurrencies. AMMs are non-custodial and permissionless in nature. Most AMMs utilize either a constant product, constant mean, or constant sum market-making formula; however, the most common is a constant product market maker, most notably Uniswap.

BONDING CURVE

Bonding curves are token distribution models that automate the relationship between price and supply. The tokens in this model are referred to as Continuous Tokens because their price is continuously calculated. In continuous token models, there is no ICO or token launch. Instead of pre-selling tokens during a launch phase, the tokens are minted continuously over time via an automated market maker contract. Tokens are minted when purchased as needed, in conjunction with demand, and used within the protocol or application when required or desired.

Continuous Tokens have other properties such as instant liquidity and deterministic price. Bonding curves act as an automated market maker such that token buyers and sellers have an instant market. Additionally, bonding curve models don't have central authorities responsible for issuing the tokens. Instead, users can buy a project's token through a smart contract platform. The cost to buy these tokens is determined by the supply of those tokens. Unlike traditional models, the cost of these tokens increases as the supply increases. This price is determined by a pre-existing algorithm, further described below. A fee of 1% is applied per trade with the bonding curve.

COLLATERAL FOUNDERS

The founding team who contributed the collateral by which the Movement DAOs genesis bonding curve was based. Additional, the founding team contributed the seed engineering funds to establish the DAO and initiative funding workflow.

COLLATERALIZATION

The borrowing of a deposit asset or assets to seek further business activities such as Yield Farming. Collateralization can amplify gains or losses, and is thus, considered riskier than not borrowing funds.

COMPOUND INTEREST

Once called the eighth wonder of the world by Einstein, compound interest allows greater interest rates and returns on investments by allowing interest gained to be automatically reinvested back in with the original deposits and accrued interest. This reinvestment period is based on the planned distribution of this interest which may be hourly, weekly, monthly, or an annual interest distribution. With compound interest, the greatest gains are often seen over a certain period in time, with a notably sharp rise in the value of investments seen at longer periods. In general, the longer a deposit benefits from compound interest, the much greater the overall gains when compared to gains made from simple interest.

CONVICTION VOTING

Conviction voting is a DAO voting mechanism whereby individuals stake their powers to vote on proposals and gather enough votes to pass over time. While this mechanism is new, in theory, the it hinders persons with strong opinions and large stakes from bridling minority voters. Here, it's not a requirement for the majority to achieve consensus on each proposal, but rather, token holders (stakeholders) can concentrate on the proposals they promote/support.

DAI

A stable coin governed by MakeDAO an organization represented by a set of codified rules, controlled by the organization members and not influenced by a central government. A DAO's financial transaction record and program rules are maintained on a blockchain. "When implemented well, a DAO allows for real-world experiments in decentralized democratic organization and control, with more freedom of action and less regulatory oversight for DAO controlled projects and products when compared to legacy corporate structures and organizations.

DAO

A DAO (decentralized autonomous organization) is an organization represented by rules encoded as a transparent computer program, controlled by the organization members, and not influenced by a central government. As the rules are embedded into the code, no managers are needed, thus removing any bureaucracy or hierarchy hurdles.

DAPP

A DApp is an online portal or other interactive software that enables direct interaction between end users and providers (e.g., connecting buyers and sellers in some marketplace, owners and stores in file storage).

DEFI

Case Str 2/32-2-VF2/07/2727-TRIKIAA Doccumment 12/32/13 Enterned on FLSID Dubbet/06/03/09/23/12 Ryngle/26/32/1 off 6/28

Decentralized Finance (DEFI) a set of Smart Contracts running independently on blockchains such as the Ethereum network that aim to enhance the profitability of investors in DeFi through automated smart contracts. DeFi tools seek to maximize returns by providing liquidity to various other protocols. These should be considered risky investments as the infrastructure is quite new and often not fully audited.

ENDAOMENT

An EnDAOment is a principal pool of capital used as a perpetual source for earning yield via DeFi activity, used to fund various movements and initiatives within the ecosystem.

ETHEREUM

Ethereum is an open-source decentralized blockchain built for smart contract development. Smart contracts allow for developers to create decentralized applications on the Ethereum infrastructure and to run their own token system on a secure and immutable platform without the need for building a dedicated blockchain.

ERC-20

A cryptocurrency protocol based on the Ethereum blockchain. An ERC-20 coin, by definition, uses this protocol.

FLASH LOANS

A type of loan that is only possible in the world of cryptocurrencies where the token is loaned out only for the length of time it takes to complete one transaction block on the blockchain. As long as the loan is paid back before the next transaction block begins there is no interest fee incurred by the borrower. Flash Loans allow for new types of investments that are nearly instantaneous algorithmic scripts to run in Smart Contracts that can be stacked upon one another for innovative yet sometimes risky investments. Flash Loans may also have vulnerabilities that may include systems vulnerabilities that take advantage of approved existing systems but are used in a novel malicious manner.

GAS FEES

Gas fees are rewards paid to Proof Of Work miners to incentivize them to support the network's transactions which become written to the blockchain. In Ethereum, this gas fee unit amount is expressed in gwei. Withdrawals or transfers to or from CEXs, DEXs Liquidity Pools, and Wallets all incur a gas fee. The amount of this gas fee will vary in cost depending on supply and demand. As currently designed: when demand on Ethereum or an ERC-20 network is at its highest, gas fees are at also their highest.

GOVERNANCE

Governance refers to the control and use of a Governance coin, token, and/or project through various measures to grow the ecosystem or product and to maximize gains for governance token holders.

GOVERNANCE TOKEN (\$MVMT)

Casese 2132 2 v - 2127 2727 7-17 RKAA Decomment 1231 213 Entended on Fils Did betwee 0/03/02/22/28 Rypgie 27 905 off 628

A token is used to govern the operations and influence the direction of a coin, token, and/or project controlled by the Governance Token. Holding these tokens are often profitable through direct price appreciation of popular governance tokens, but may come with other benefits that are only available to governance token holders and voters. Holders of the MOVE token help to shape the future of the Movement DAO ecosystem by voting on governance initiatives.

HATCH PRICE

The price paid per token by when hatching a new Movement.

IMPERMANENT LOSS

I Automated Market Makers (AMM) and liquidity providers (LPs) contribute assets for liquidity to market participants. These AMM pools utilize a bonding curve, typically built on a constant function market marker formula. Asset prices are constantly changed by the AMM pool in response to trading activities by participants. This is an effort to ensure that LPs can receive the same amount of assets they deposited when they withdrawal. However, due to the volatility of asset prices and arbitragers, LPs occasionally will not receive the exact amount of assets upon withdrawal. The dollar value of the assets they withdraw would typically be lower than if they had no provided liquidity and just held the assets. This dollar value shortfall is known as impermanent loss. The loss is said to be impermanent because if asset prices return to the level during withdrawal the loss is eliminated.

INITIATIVES

Initiatives are projects proposed by the movement community. Token holders vote on which initiatives receive funding. Funding is provided by the reserve pool & direct tributes. Funding is distributed incrementally when predetermined milestones are achieved. Initiatives are proposed with those milestones.

INSTANT LIQUIDITY

Tokens can be bought or sold instantaneously at any time, the bonding curve acting as an automated market maker. A bonding curve contract acts as the counter-party of the transaction and always holds enough ETH in reserve to buy tokens back.

LIQUIDITY

A measure of how much available circulating supply there is of an asset or currency, and the activity of that asset or currency in an exchange, economy, or network. A currency with low supply and/or circulation is said to be illiquid.

LIQUIDITY MINING

An energy-efficient form of cryptocurrency mining that supports work and transactions on a blockchain usually without expensive application or hardware-specific equipment required by older forms of cryptocurrency mining. Rewards are provided to liquidity providers as a means to incentivize liquidity mining providers, in addition to growing and supporting a blockchain's user base.

LIQUIDITY POOL

An LP, or Liquidity Pool, is a pool of deposited funds meant to provide liquidity to a currency, network, or Smart Contract. Liquidity is considered the lifeblood of any physical or digital currency, exchange, or financial network, so there will be designed rewards or incentives given to those who provide liquidity to LPs.s.Liquidity Providers-In the realm of cryptocurrency and DeFi, this refers to investors who deposit an asset to provide liquidity on an exchange and/or network(s) to gain an ROI on their investment. Investors deposit one or more of their digital assets into decentralized Liquidity Pools (LPs) to provide liquid capital to exchanges and smart contracts. Liquidity Providers often provide two or more types of assets, in which Impermanent Loss is sometimes seen.

LOCK AMOUNT

The minimum amount of the configured token that must be locked in order to submit a proposal.

LOCK DURATION

The minimum amount of time the configured token will be locked for in order to submit a proposal.

MAKERDAO

Maker is a decentralized governed financial ecosystem based on a Stablecoin called DAI. DAI is algorithmically pegged to \$1 USD, with no volatility. A digital asset with no volatility at all, is sometimes seen as a hedge or safety measure in times of high volatility or during Bear markets.

MARGIN

An available avenue of borrowed capital that is considered very high risk, as collateral must be provided for a margin loan to secure the loan. It is called margin or a margin loan because a risky loan is being taken on the margins of the investment to hopefully amplify gains for the investor or trader. A margin loan is considered very high risk as the deposited base asset is at risk of liquidation during a margin call.

MARGIN CALL

The act of implementing a Forced Liquidation or Liquidation Event when an investor or trader cannot meet debt obligations on leveraged trade positions. Margin calls can be triggered by rapidly changing market conditions and high volatility that bring Liquidation Events for some leveraged traders on exchanges and markets.

MARKET CAPITALIZATION

A measure of the total funds invested in a company or project. This market cap of a coin, company, or project can be calculated by multiplying the asset's unit price by the total number of coins.x.MetaMask-MetaMask is a popular mobile or desktop software cryptocurrency wallet that can hold, transmit or receive Ethereum and ERC-20 compatible coins or tokens.

MINIMUM APPROVAL %

This is the minimum amount of approval amongst the total membership required for a proposal to be valid, this can be set high if you want to ensure people are actively participating or it can be set to 0% so there is no quorum requirement enforced.

MINING POOL

A pool of cryptocurrency miners that provides mining services to a cryptocurrency network. Mining Pool operators and contributors are incentivized by a coin or token's programmed mining rewards to support transactions and provide liquidity on a coin's network.

MOVEMENT

Movements are broadly defined as communities organized around a shared mission, or example, social movements such as racial justice, environmental movements such as saving endangered species, or public goods movements such as art projects. Within the Movement DAO structure, these communities are radically empowered to organize and fund their most important initiatives in a fun, secure and trustless way. For the first time ever, these movements have the infrastructure to finance their causes with economic alignment. For the first time ever, the infrastructure exists to prevent tragedy of the commons.

MOVEMENT EVANGELISTS

Movement evangelists are nominated by their respective communities to spearhead movement awareness campaigns and to coordinate communities around funding. Movement Evangelists are also responsible for token giveaways.

MULTISIG WALLET

A multiple signature wallet is a cryptocurrency wallet that controls access and changes to one or more Smart Contracts. Community governed projects like a DAO often require multiple signers to approve a transaction before it will be executed. For community-based efforts, Multisig wallets for DAOs and DeFi projects are often implemented as 6 of 9 wallets, where 6 of 9 community wallet signers must agree to sign a transaction before a Smart Contract can be implemented.

ORACLE

A feed of data, such as the current market prices of an asset or assets, that provides a high confidence service to users and other services that the source and detail of the oracle's data are timely, accurate, and untampered. Sources of data may be singular or decentralized sources and may be dispersed geographically from one another. All exchanges and markets require accurate and timely information to operate properly at high efficiency. An example of the most well-known oracle protocol is Chainlink (LINK).

POOL

CCascest22323v2/2/2/2/2/2/2/2/2/PRAYAA CIDOCOMMINION OF LEGISTER L

A smart contract containing shared amounts of assets provided by depositors. Pools are either used in Automated Market Makers (AMMs)for optimized trading purposes, lending aggregation (yPool), or in shared yield farming strategies (yVaults), among other things.cc.Protocol-In High Technology, a protocol is a set of developed rules or specifications. These rules detail definitions, standards, limitations, and potential stipulations of a protocol. Examples of technology protocols include TCP/IP and ERC-20.

POST-HATCH PRICE

Post-Hatch price - The price per token at the launch of the Movements when the curve is set and anyone can join with the Commons

RAGE QUIT

"Rage quitting" is a function built into DAO's smart contracts that allows a member to take its unallocated capital contribution and leave the DAO.

REBALANCE

To make changes to a portfolio or pool of funds for various reasons. An automated or manual tactical change to a yield farming strategy that is meant to nearly instantaneously do one or more of the following actions: Gain profits through arbitrage Take or secure profits Reduce risks to investors or pooled funds During periods of high volatility, the latter is especially the case if margin or leveraged funding is used by the trader, investor, or controller in charge of pooled funds. If an assessment is made that market conditions are a risk to invested funds, mitigation efforts will be implemented either autonomously or through manual intervention to reduce risks to invested funds.

SMART CONTRACT

A digital contract that is programmed in a language that is considered Turing complete, meaning that with enough processing power and time, a properly programmed Smart Contract should be able to use its code base and logical algorithms to perform almost any digital task or process. Ethereum's programming languages, such as Solidity and Vyper, are Turing complete.ff.Spread-When an order is made on an exchange or market, the disagreement of the difference in price between potential buy and sell offers of an asset is called the spread. A wide spread in price can lead to higher slippage.

SPAM PENALTY %

Modifies the Lock Amount and Lock Duration depending on the number of currently active locks the proposer has.

STABLECOIN

In cryptocurrency, it is a digital cryptocurrency equivalent to one (1) Dollar USD. In theory, the price of the stablecoin is pegged to the US Dollar, but in practice, there is some variance to nearly all stablecoins except for coins like DAI, which are designed with no volatility.

STAKE

The act of depositing a cryptocurrency coin or token into a yield farming project and/or protocol, whether the access to the project is either through CeFi or DeFi methods. Stakers hope to gain interest on their deposits into these yield farming projects and offerings. CeFi is considered safer for several reasons -including strict rules, permitting, and regulations. However, DeFi tends to give much high rewards, while being accompanied with much higher risks, the earlier the investor participates in the project's lifecycle, testing, and development. The act of staking a cryptocurrency deposit to yield farm additional cryptocurrency via CeFi or DeFi staking offerings, programs, or projects.

TESTNET

A testing network for a new token, project, or product, or for potential improvements to an existing product or offering. Testnets are used to test the viability and vulnerability of new ideas, concepts, code, and processes prior to moving on to a production network or networks of some sort.

TOKEN

A type of coin, except with much greater functionality. Tokens can also be used as a method of payment like coins, but unlike coins, they can excel at other use cases such as the democratic governance of a protocol or system, or as a means to use underlying coins to make liquidity tokens from these coin deposits. These liquidity tokens could then be used in innovative new strategies elsewhere via delegated funds to amplify gains with little risk to the underlying asset the liquidity token is based upon. An investor could choose this action so that further gains to their assets may be made by using the automated actions of intelligent Smart Contracts to optimize gains.

TOTAL AVAILABLE CAPITAL

Represents the total deployable capital in treasury reserves that can be used to fun initiatives within a movement. Token holders will vote to determine how to use "Total Available Capital" reserves.

TOTAL FINANCIAL BACKING

Represents the total "potential" influence of an entire movement community. In crypto terms, one might refer to this value as market capitalization. This number represents the total assets that are collateralized in stable coins on the bonding curve.

TRAGEDY OF THE COMMONS

An economics problem in which every individual has an incentive to consume a resource, but at the expense of every other individual — with no way to exclude anyone from consuming. Initially it was formulated by asking what would happen if every shepherd, acting in their own self-interest, allowed their flock to graze on the common field. If everybody does act in their apparent own best interest, it results in harmful over-consumption (all the grass is eaten, to the detriment of everyone).

TRIBUTE

Exit Tribute - The percentage that goes to the Funding Pool when token holders 'sell' by burning their token at the price determined by the ABC. If the Exit Tribute is 10% and the price is 1 DAI/token then, for every token burned, the exiting token holder would get 0.9 Dai and the Funding Pool would get 0.1

Hatch Tribute - The percentage of the funds raised during the Hatch that goes directly to Funding Pool to be used to support the Commons' mission, the rest goes to the collateral pool

TURING COMPLETE

In programming, it refers to a language that is powerful and semi-autonomous, in a way. When a language such as Solidity or Vyper is Turing complete, it means that with enough processing power and time, a properly programmed Smart Contract using a Turing complete language should be able to use its code base and logical algorithms to perform nearly any digital task or process. A Turing complete language can even be programmed to have impacts on real-world activities through electronic means, as these rapidly executed digital commands can trigger actions in the real world through sensors, relays, switches, cameras, alarms, and alerts that can trigger a human and/or automatic response. The concept of a Turing complete programming language was named after the inventor of the idea, Alan Turing. He was an unsung war hero and legendary mathematician. Turing was also a renowned and brilliant computer scientist, cryptanalyst, and forward thinker.

TVL

Total Value Locked into a Smart Contract or set of Smart Contracts that may be deployed or stored at one or more exchanges or markets. This is used as a measurement of investor deposits. It is the dollar value of all the coins or tokens locked into a platform, protocol, lending program, yield farming program, or insurance liquidity pool.

YIELD FARMING

Yield farming is the practice of staking or lending crypto assets in order to generate high returns or rewards in the form of additional cryptocurrency. This innovative yet risky and volatile application of decentralized finance (DeFi) has skyrocketed in popularity recently thanks to further innovations like liquidity mining. In short, yield farming protocols incentivize liquidity providers (LP) to stake or lock up their crypto assets in a smart contract-based liquidity pool. These incentives can be a percentage of transaction fees, interest from lenders or a governance token (see liquidity mining below). These returns are expressed as an annual percentage yield (APY). As more investors add funds to the related liquidity pool, the value of the issued returns decrease accordingly.

VOLATILITY

A statistical measure of the price variation of an asset. Newer early-stage projects in the explosive growth stage tend to see very high volatility in the price of their assets in their early days. Volatile assets are often considered riskier than less volatile assets because the price is expected to be less predictable.

Legal

Service Provider

What are the external costs involved with the DAO?

DAOs are currently not universally recognized as legal entities. Therefore in addition to overseeing the assets of the DAO and how they are distributed by being one of the signers for the Gnosis Safe - dao-lawfirm.eth, the DAO through its members are responsible for the costs associated with its activities. This includes reviewing statements made in this GitBook, what the tokens maybe used for and what Legal Disclaimers and Terms of Use are acceptable given the current laws.

Fees and Expenses

Movement DAO developer contemplated the use of a service provider to help facilitate, for example, paying other service providers who may not be strictly anonymous or accepting of Ethereum. Currently an anonymous donor is paying for the fees associated with the service provider until the DAO governance if formed and snapshot votes render the will of its members.

Following other DAOs, with different charters, such as Flamingo DAO, and the fees associated with their activities, we estimate spending 2% of the assets held per year on such legal services.

Upon the formation of the governance for Movement DAO, this will be submitted for the community vote via snapshot.

Overview

This section is a brief summary of the highlights of the terms of use of the DAO's website or services. We know that many terms of services can be long and full of confusing language so we have done our best to summarize the Terms in language that you will understand. When you accept this Agreement, you are accepting all of our Terms and not just this section. Simply by browsing the Site, you are agreeing to our Terms, so please read carefully.

Movement DAO is an experimental, novel approach to nonprofits devoted to performing good works and encouraging social justice in today's contemporary society. The DAO is a blockchain-based organization that raises funds through the purchase of tokens that entitles the purchaser, or member, to champion specific nonprofit works or projects and seek additional funding from like-minded individuals. Movement DAO hosts blockchain software as a backend service for customers who set up their own accounts and purchase tokens.

Movement DAO is neither designed to be, nor is it set up to be, an investment vehicle and no jurisdiction has deemed any token produced by Movement DAO to be a "security" as defined by the 1933 Securities and Exchange Act ("The Act"). Movement DAO is specifically designed to take advantage of the benefits of the blockchain and cryptocurrencies to ensure that contributions to nonprofit works will have a larger impact based upon larger financial backing than traditional nonprofit corporations or charities.

THESE LIMITATIONS APPLY REGARDLESS OF LEGAL THEORY, WHETHER BASED ON TORT, STRICT LIABILITY, BREACH OF CONTRACT, BREACH OF WARRANTY, OR ANY OTHER LEGAL THEORY, AND WHETHER OR NOT WE WERE ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

Warranty Disclaimer

MOVEMENT DAO MAKES NO WARRANTY OF SUCCESS OF ANY PROJECT OR MOVEMENT NOR DOES IT MAKE REPRESENTATION OR WARRANTY REGARDING THE WORTH OR VALUE OF ANY TOKEN PURCHASED IN SUPPORT OF A PROJECT OR MOVEMENT. THE MEMBER AGREES THAT HE OR SHE ACCEPTS ALL RISK OF LOSS FOR ANY TOKEN PURCHASED THROUGH MOVEMENT DAO AND THAT NO REPRESENTATION REGARDING THE FUTURE VALUE OF ANY TOKEN HAS BEEN PROVIDED TO ANY MEMBER OF THE DAO.

SOME STATES DO NOT ALLOW THE DISCLAIMER OF IMPLIED WARRANTIES, SO THE FOREGOING DISCLAIMERS MAY NOT APPLY TO YOU. THIS PARAGRAPH GIVES YOU SPECIFIC LEGAL RIGHTS AND YOU MAY ALSO HAVE OTHER LEGAL RIGHTS THAT VARY FROM STATE TO STATE.

Indemnification (or What Happens If You Get Us Sued)

Governing Law

No matter where you are located, the laws of the State of Florida will govern these Terms and the parties' relationship as if you signed these Terms in Florida, without regard to Florida state's conflicts of laws rules. That member shall still be allowed to sell the tokens, at his or her discretion, on the bonding curve, as outlined above.

No Waiver

Our failure to exercise, or delay in exercising, any right, power, or privilege under this Agreement shall not operate as a waiver; nor shall any single or partial exercise of any right, power, or privilege preclude any other or further exercise thereof.

If it turns out that any term or provision of this Agreement is invalid, void, or, for any reason, unenforceable, such term or provision will be deemed severable and limited or eliminated to the minimum extent necessary. The limitation or elimination of this term or provision will not affect any other terms of this Agreement.

Adopt the DAO's Guiding Principles, Terms of Service, and Code of Conduct, attached hereto as Exhibits B, C, and D. Appoint **Benjamin Reed** (**benreed.eth**) to act as the DAO's Secretary, **Authorized Member**, and to file the necessary federal application for the DAO IRS EIN Number Application, as well as to research and prepare the required documents for the DAO affiliate entities, including DAOLABS, in order to comply with applicable law.

- Guiding Principles: Establish the DAO as an Unincorporated Nonprofit Association pursuant to the Delaware Unincorporated Nonprofit Association Act.
- Terms of Service: An agreement between the DAO and parties who use the DAO's services or resources.
- Code of Conduct: Defines community Member standards and community enforcement quidelines.

Motivation

The DAO seeks clarity with regards to legal structure and the relationship between its Members and non-Members alike. These agreements contribute to a healthy, transparent and well functioning organization while addressing the lack of clear legal guidance regarding "DAOs".

The Community Conduct Guidelines establish expectations for all Members' conduct. The Terms of Service establishes the agreement between the DAO and users of the DAO's decentralized

The appointment of an **Authorized Member** will enable the DAO to properly structure the product entities, non-profit entities, and account for each cost center properly. In an overall effort to move to transparent operations managing payouts from the appropriate legal entity, including the management of cryptocurrency on-ramp and off-ramp solutions, and the protection and management of intellectual property concerns via DAO affiliates such as DAOLABS. Prepare future proposal mip-0003 in which to seek budget and funding to deploy the DAO affiliates. The Service Providers will prepare these affiliate entities, governance, and develop processes for ongoing governance, of while some portion of the above budget will be used for reimbursements of expenses, legal fees, and other costs.

Specification

Ratify and adopt the DAO's Guiding Principles, Terms of Service, and Code of Conduct.

Update the DAO's Discord server, docs, and other relevant resources to reflect these changes.

Rationale

Ratifying the Guiding Principles establishes an Unincorporated Nonprofit Association, which, in turn, will:

- recognize the DAO's legal standing as an entity;
- allow the DAO to hold accounts, property, and enter into agreements;
- clarify Membership processes, e.g. define duties owed to each other;
- adopt the Unincorporated Nonprofit Association model act language, where appropriate;
- establish and adopt unique and specific terms with regards to the DAO's structure, operations,
 and ownership of property;
- adopt the role of the Service Provider and the activities authorized; and
- remove ambiguity generally, i.e. regarding its intellectual property.

The Terms of Service will clarify the DAO's:

 requirement for parties interacting with the DAO's application and resources to take full responsibility;

- unambiguous position on the DAO's adherence to state and federal statues;
- risks associated with reliance and deference to the technology employed in the DAO's operation;
- conditions of use, demand for compliance with all applicable laws and regulations (including U.S. Securities law, Office of Foreign Assets Control compliance, etc.);
- explicit prohibited activities (including activities which are illegal or harmful to the DAO or its Members);
- limitations in liability, and disclaimers by the DAO;
- requirement for indemnification by the user under certain circumstances;
- requirement for the user to promise not to sue the DAO, or its Members;
- language regarding arbitration, and processes for dispute resolution;
- process on computation of damages, attorney fee's, and notice via Blockscan;
- privacy policy, including a verbose general warning on blockchain usage;
- risks associated with DAO's online resources; and
- users' legal, financial, and ethical responsibilities when using the DAO's resources.

The Code of Conduct will state the DAO's position with regards to:

- requirements for Members to unequivocally be honest;
- community standards emphasizing honesty, inclusion, and respect; and
- enforcement guidelines for Members who violate these standards.

The DAO's Unincorporated nonprofit association requires an authorized Secretary and Member to file the necessary federal application for the DAO's IRS EIN Number Application.

Risks

- By forming an Unincorporated Nonprofit Association, the DAO may incur taxes.
- These documents may not adequately address DAO's legal concerns.
- These documents are long and may be difficult to read.

Timeline

These documents should be implemented once this proposal is ratified, only to be removed when superseded or amended by another proposal seeking to do the same.

Introduction.

These guiding principles constitute an Agreement (hereinafter the "Agreement") and are entered into by and amongst Members of DAO, also known as Move (hereinafter "DAO"), an unincorporated nonprofit association organized under the **laws of the State of Delaware**.

The following terms apply when you click to view or access DAO's Dapp, DAO's online services or any of DAO's sites, contribute or transfer cryptocurrencies such as Ethereum, or transfer one or more ERC-20s ("Tokens"), ERC-721s ("NFTs"), or other digital assets (collectively, "Cryptographic Currencies") to the DAO, become a Member of DAO, receive DAO Governance Tokens, hold Governance Rights for the DAO, interact with or access the DAO's smart contracts in any way,

provide services to the DAO, donate or transfer any property to the DAO, or otherwise interact with or access any other of the DAO's services. DAO's governance may occur on Snapshot; for the purpose of this agreement we refer to this as part of the DAO Dapp.

By doing any of the above, you signify your agreement to these terms. If you do not agree to be bound by the Agreement in its entirety, you may not access, interact with, or use the DAO Dapp or online services.

Capitalized terms used herein have the meanings ascribed to them in the Definitions. Any terms which are defined herein supersede any definition contained in the associated document.

1. Organization.

- (a) Formation. The DAO was formed on *February 1, 2022*. The obligations of Members of the DAO shall be determined pursuant to the Delaware Uniform Unincorporated Nonprofit Association Act, Del. Code Ann. Tit. 6, §§ 1901-1916 inclusive (the "Act"), and this Agreement.
- **(b) Purpose.** The primary purpose of the DAO is to develop programmable, community-focused Ethereum ("**Cryptocurrency**") treasury applications which can operate openly on the blockchain at any scale. The DAO additionally develops tooling to interact with existing financial infrastructure (including fiat), digital asset creation (e.g. NFTs), and marketplace applications to enable communities to participate in any type of lawful activity native to or related to Cryptocurrency. The purpose of the DAO is scoped to non-profit and charitable purposes and purposes outside of this scope are not permitted. The companion purpose section of this document is included in its entirety herein. Any terms which are contained herein supersede any definition contained in the associated document.

The DAO is an unincorporated association of individuals, corporations, statutory trusts, business trusts, estates, trusts, partnerships, limited liability companies, associations, joint ventures, and other legal or commercial entities, many of whom, if not all of whom, agree to join together for a common, nonprofit purpose. For the DAO, that purpose is encapsulated in its mission statement.

The DAO is not intended to be or become an entity required to register as an "investment company" as defined in Section 3(a)(1)(A) of the Investment Company Act of 1940, as amended.

2. Membership; Governance Rights and Tokens; Limitations.

- **(a) Governance Rights.** Governance Rights in the DAO are represented by Project Tokens, with each Token representing a fractional part of the Governance Rights of all Members (or assignees, as the case may be) equal to the quotient of one (1) divided by the total number of Tokens claimed at any time. Member's Governance Rights are subject to DAO Governance.
- **(b) Tokens.** As of the date hereof, there shall be an allowance of up to the max of $2(^{256-1})^1$ tokens authorized to represent Membership interests in the DAO, unless otherwise agreed to by the Members via a vote occurring through the Dapp. Membership in the DAO, as defined by Del. Code Ann. Tit. 6, § 1901, shall be voluntary and open to any individual whose purpose or presumed intent is to contribute to the DAO and is willing to accept responsibilities and terms of Membership. The DAO shall grant the initial Member's governance voting tokens proportional to contributions to the DAO's Gnosis Multi-signature wallet.²

Notwithstanding the foregoing or any other provision of this Agreement, the DAO may provide initial Members Tokens for their role in conceiving and supporting the DAO.

- (c) Limitation to the DAO Protocol Configuration. The DAO shall not configure its Juicebox Treasury with an undefined Reserved Rate, a Reserved Rate of 0%, a Redemption Rate of 100%, or a Discount Rate other than 0%. The DAO shall not configure its Juicebox Treasury with any parameters that would cause the capital value of Token Redemptions via the Redemption Rate to exceed the cost basis required to issue those Tokens from the DAO's Juicebox Treasury.
- **(d) Admission.** The DAO is a decentralized network of Members and may admit or deny individuals for any arbitrary purpose or lack of purpose.
 - **(i) Initialization.** On February 1, 2022, the DAO initiated a distribution of the DAO's NFT Collection to the top one-thousand (1500) addresses on Snapshot via a total usage count of Membership DAOs, authored proposals, and votes cast. The purpose of the NFT distribution was to foster a fair and equitable distribution of the governance NFT, to initialize the DAO community, garner interest in directing the DAO development efforts. The DAO did not require any Membership contributions or fees to participate in this distribution. Contributions to the DAO's Gnosis Multi-signature wallet were separate. Contributions to the DAO's Multi-signature wallet represents the token distributions based on a computation of Cryptocurrency contributions to Project Tokens.

(ii) Distribution of Member Tokens. All of the DAO's governing Members shall have their Membership determined upon receipt of voting tokens acquired on a public blockchain via contributions to the DAO's Gnosis Multi-Signature Wallet (Etherscan Mainnet) 0x143cC0A996De329C1C5723Ee4F15D2a40c1203c6. The tokens are to be distributed on a bonding curve. DAO will operate as a Member Project which will issue Project Tokens to both Gnosis contributors and Member Projects, at rates yet to be determined. ("Cryptographic Units", and holders, "Members"). Cryptographic Units are used for participating in and improving the governance of the DAO through affirmative votes effectuated via the Designated Smart Contract (defined herein) or more commonly, Snapshot, the popular off-chain voting protocol ("Snapshot") (such processes are "Cryptographic Consensus"). Once the DAO admission requirements are met, a prospective Member's admission may be put up for a vote held among DAO Members. The DAO will consistently review admissions, and if necessary, Members may make adjustments to the DAO admission requirements based on their evolving needs and as registered by Cryptographic Consensus. Notwithstanding, the DAO may admit all individuals who hold the DAO token by capturing an inventory of all current holders and ratifying the Membership at Governance intervals from time to time as registered by Cryptographic Consensus.

The DAO may have more than one Member Tokens which has Membership purpose, such as the Governance NFT available at 0xdd407a053fa45172079916431d06E8e07f655042. The DAO shall authorize or discontinue the use of Member Tokens from any Cryptographic Units at any time, or use a Member Token for a duration before migrating to another. The DAO shall defer to the Service Provider in the fair and equitable distribution of Member Tokens, and/or the service of other governance tokens. The DAO shall, at its discretion, by the advice of the Service Provider, or by the majority vote of the DAO, retire governance tokens, including discontinuing Membership by Members holding the DAO governance token without any further notice.

- (iii) Development of the DAO application Notwithstanding the aforementioned governance between the DAO NFTs and the DAO's weighted whitelist Members, the combined parties are Members and language within this agreement pertaining to the future anticipated governance on additional DAO applications are provided as a notice to Members of the eventual transitioning of governance tooling and computation. The DAO is developing a governance application which it intends to use and provide all aspects of to Member Projects before the end of 2022.
- (e) Token Liquidity Pools. The DAO shall not create any Liquidity Pools.

- (f) Governance Rights and Token Limitations. Governance Rights and the governance Tokens provide no possibility of profits and losses, no rights to distributions and dividends, and no rights to ownership or management of the DAO. Each Member (or assign, as the case may be) that receives or holds governance Tokens expressly and unequivocally agrees that the Tokens provide no rights to profits and/or losses, that the Tokens do not entitle their holder to distributions or dividends, and that the Tokens do not make their holder an owner or manager of the DAO. Members who provide their Cryptographic Signature upon use of the Dapp shall agree with this section 2(f) explicitly and unequivocally, and will be deemed as to have read, understood, and sought counsel with regard to this section.
- **(g) Token Reserved Rate.** Notwithstanding the foregoing or any other provision of this Agreement, contributors to the DAO shall be entitled to receive Reserved Rate Tokens by a vote of the Members, via the Reserved Tokens list, as defined by the DAO's Juicebox Protocol configuration. Each Member expressly and unequivocally agrees to 2(f) above.
- (h) Responsibilities. As of the date hereof, Members are not required to submit to any dues or Membership fees. However, in the event the Members agree otherwise via a vote occurring through the Dapp or Snapshot, each Member shall keep reasonably current in payment of any dues or Membership fees and other financial obligations of Membership, if applicable and determined by the DAO. Each Member shall notify the DAO of a Discord, Twitter, or other acceptable communication channel by which that Member may receive written or electronic materials required or permitted by this document, or shall notify the DAO that such Member lacks the standard acceptable addresses and designate a mutually acceptable form of communication.

If you have received any Tokens or are otherwise a Member, you consent and agree to become legally bound by this Agreement as both a participant in the DAO and more specifically a DAO "Member".

The failure of the DAO to observe formalities relating to the exercise of its powers or management of its activities and affairs is not grounds for imposing liability on a Member of the DAO for a debt, obligation, or other liability of the DAO.
- **(b) Member Limitations.** No Member shall have the right or power:
 - (i) to cause the dissolution and winding up of the DAO; or
 - (ii) to demand or receive property, including any Cryptographic Currency or ERC-20 or ERC-721 Tokens ("Cryptocurrency Assets") contributed or otherwise transferred to the DAO, except as agreed to by the Members or otherwise provided herein.

4. Admission of Additional Members.

- (a) Subject to the provisions of this Agreement, the Members are authorized to accept additional donations from one or more Members, and to admit other Persons to the DAO as additional Members (each such additional Member and such existing Member is an "Additional Member"). Unless otherwise determined by the Members, any such Additional Members shall be admitted to the DAO only if such Member or Additional Member makes a donation or contribution via the Dapp.
- **(b) Accession to Agreement.** Each Person who is to be admitted as an Additional Member pursuant to this Agreement shall agree to be bound by all of the terms of this Agreement as if they were a Member from the inception of the DAO.

5. Management.

- (a) Except as otherwise expressly required in this Agreement, the affairs of the DAO shall be carried on and managed exclusively by the Members, who shall have sole and absolute discretion with respect thereto. No Member shall be a manager, as defined under the Act.
- **(b)** Whenever any action, including any approval, consent, decision, determination, or resolution is to be taken or given by the Members or the DAO under this Agreement or under the Act, it shall be authorized by a vote of the Members via the Dapp or the DAO's Snapshot Spaces, unless otherwise provided herein. Such an authorization may be evidenced by a vote facilitated via the Dapp or the DAO's Snapshot Spaces and one or more smart contracts, or by a written consent, in accordance with this Agreement. The Members intend that any action (which has been duly approved in accordance with this Agreement) taken by the DAO via a Dapp, a smart contract, or the blockchain shall be a valid action of the Members or the DAO, as applicable, and no Member shall challenge the authority or validity of any such action based solely on such a fact.
- **(c)** Except as otherwise expressly required in this Agreement or in the Act, no single Member (in their capacity as a Member) shall have authority to bind the DAO in any way or to enter into any agreement or contract obligating the DAO in any way unless approved via a vote occurring through the Dapp.
- **(d)** To the extent that the Members have approved a document in accordance with the terms of this Agreement and the Act, any Member can hereby be expressly authorized to execute and deliver such a document on behalf of the DAO.
- **(e)** Members may appoint a proxy to vote or otherwise act for the Member with regards to the DAO pursuant to the Dapp.
- **(f)** The DAO has the right to delegate certain technical or administrative responsibilities to third parties and provide them with reasonable compensation.
- (g) Reliance by Third Parties. Persons dealing with the DAO are entitled to only rely conclusively upon the power and authority of the Members (and any Person to whom the Members have delegated any such power and authority pursuant to this Agreement) by an explicit governance ratification of such power and authority. Therefore, any acknowledgement that such Member or assign is authorized to act on behalf of the DAO and may bind the DAO or otherwise enter into a binding contract may only be relied upon as evidenced by the DAO governance process as defined by Dapp proposals.

(h) Other Activities. Each Member acknowledges and agrees that in addition to transactions specifically contemplated by this Agreement, and subject to applicable law, certain Members within the DAO and their respective Affiliates and Representatives are each hereby authorized to obtain property or obtain services from, to provide property or provide services to, or otherwise enter into any transaction with certain Members, or any Affiliate or Representative of any of the foregoing Persons, pursuant to clear approval via the Dapp and DAO governance.

6. Withdrawal Rights; Compulsory Withdrawal; Non-Disparagement.

- (a) Limited Right to Withdraw. A Member may withdraw at any time by transferring its Tokens to a third party. Such a withdrawal shall be facilitated and executed, in part, using one or more smart contracts, and shall be effective as of the date of transfer. Any withdrawal is irrevocable. Alternatively, a Member may redeem the entirety of the Tokens held by submitting the tokens to via the Juicebox Protocol and burning them, thereby reducing the total Project Token supply. In return, the Member may receive **some portion** of their initial or cumulative DAO Membership holdings in Ethereum (or other Cryptographic Currency). A Member who burns the entirety of their token holdings shall be deemed to have withdrawn from the DAO. The DAO shall not be obligated to pay any interest or other compensation to a Member who redeems or withdraws its Tokens.
- **(b) Compulsory Withdrawal.** Not in limitation of Section 6(a), the Members acting by vote via the Dapp may cause a Member to be compulsorily withdrawn from the DAO to the extent that such Members, in their reasonable discretion, determine it to be necessary, desirable, or appropriate, including without limitation to comply with applicable law or regulations, or to avoid a material adverse effect on the DAO or the other Members. For the avoidance of doubt—the Member proposed to be compulsorily withdrawn shall be entitled to vote with respect to any vote of the Members regarding that Members' compulsory withdrawal.
- (c) Emergency Immediate Compulsory Withdrawal For Cause. Not in limitation of Section 6(a), 6(b), the Service Provider, in their reasonable discretion, is expressly authorized to remove a Member without notice or vote of the Members if the Service Provider determines such a removal to be necessary, desirable, or appropriate, including, without limitation, to comply with applicable law or regulations, or to avoid a material adverse effect on the DAO. For the avoidance of doubt—the Member to be compulsorily withdrawn shall be entitled to vote with respect to any vote of the Members regarding such compulsory withdrawal, unless the Member is deemed to be in violation of the Code of Conduct and Community Enforcement Guidelines.

(d) Non-Disparagement Not in limitation of Section 6(a), 6(b), 6(c) and 6(d). During the term of the DAO Membership, and thereafter, the Member shall not make any disparaging remarks, or any remarks that could reasonably be construed as disparaging regarding the DAO, its Members, its affiliates, or its agents. The DAO shall, except to the extent otherwise required by applicable laws, rules, or regulations, or as appropriate in the exercise of the Community Enforcement Guidelines and the Terms of Service, exercise reasonable efforts to cause the following individual(s) to refrain from making any disparaging statements, orally or in writing, regarding the DAO, its Members, or agents during and after the Membership period.

7. Fees and Expenses.

(b) Operating Expenses.

- (i) The DAO shall bear all costs and expenses relating to its activities, maintenance, and operations, including, without limitation, all fees, expenses, and costs associated (directly or indirectly) with the acquiring, holding, monitoring, and commissioning of artwork, identifying DAO opportunities to fulfil its purpose and any extraordinary expenses (including, without limitation, litigation-related and indemnification expenses), legal, regulatory, research, consulting, compliance, auditing, accounting, and other professional fees and expenses, the costs of any administrator, the costs of any reporting to Members, expenses of any administrative proceedings undertaken by the applicable Member in its capacity, expenses incurred in connection with the dissolution, liquidation, and termination of the DAO, and other expenses related to the DAO as determined by the Members by a vote via the Dapp (collectively, and together with organizational expenses, the "DAO Expenses").
- (ii) DAO Expenses shall be allocated to and funded by the DAO.

8. Distributions; Dividends; Compensation.

- (a) The DAO shall not make any distributions of any kind and it will not pay dividends of any kind to any Member or director/officer or other person who may have an ownership interest in the DAO.

 - (i) a determination of the Members by Majority Vote; or
 - (ii) the entry of a decree of judicial dissolution pursuant to the Act.
- **(b)** Upon the dissolution of the DAO, assets shall be distributed for one or more exempt purposes which are within the meaning of section 501(c)(3) of the Internal Revenue Code or the corresponding section of any future federal tax code and which are consistent with the goals and purpose of the DAO, or the assets shall be distributed to the federal government, or to a state or local government, for a public purpose. Any such assets not so disposed of shall be disposed of by a court of competent jurisdiction of the county in which the principal office of the DAO is then located, exclusively for such purposes or to such organization or organizations, as said Court shall determine, which are organized and operated exclusively for such purposes.

10. Limitations on Transfers.

- (a) Transfers. Governance Rights and Tokens are not transferable, except to other Members. Members may vote to allow or disallow the ability of Members to transfer their Governance Rights and/or Tokens by a vote facilitated via the Dapp. Tokens may become freely transferable to Ethereum addresses outside of the DAO ("External Addresses") by a vote of the Members. In the event the Tokens become freely transferable to External Addresses, you agree that holders of External Address which Tokens are transferred to shall automatically be granted Membership rights, subject to this Agreement.
- **(b) Admission of Substituted Members.** If the transferee is not already a Member, any transferee of Tokens transferred in accordance with the provisions of this Section shall be admitted as a Member. The DAO shall not for any purpose recognize any purported transfer of all or any part of a Member's interest or Tokens in the DAO, and no purchaser, assign, transferee, or other recipient of all or any part of such Tokens shall become a Member hereunder unless:

- (i) The transferee of Tokens transferred pursuant to this Section that is admitted to the DAO as a transferee Member shall succeed to the rights and liabilities of the transferor Member with respect to such transferred Tokens.
- (ii) Effect of Death, Dissolution, or Bankruptcy. Upon the death, incompetence, bankruptcy, insolvency, liquidation, or dissolution of a Member, the rights and obligations of that Member under this Agreement shall accrue to that Member's successor(s), estate, or legal representative, and each such Person shall be treated as an unadmitted transferee of that Member's Tokens, as described in the Act.

11. Books and Records; Accounting and Tax Matters.

The DAO shall not be obligated to keep any books or records beyond what is made available via the Dapp or available via the Ethereum blockchain.

12. Waiver of Fiduciary Duties.

- (a) Except as expressly set forth in this Section, in the event that any Member initiates any Proceeding against the DAO and a judgment or order not subject to further appeal or discretionary review is rendered in respect of such Proceeding, as the case may be, that Member shall be solely liable for all costs and expenses related to the Proceeding.
- **(b)** Limitation by Law. No provision of this Agreement shall be construed to provide for the indemnification for any liability to the extent (but only to the extent) that such indemnification would be in violation of applicable law, but instead shall be construed so as to effectuate the provisions thereof to the fullest extent permitted by law.
- (c) Waiver of Fiduciary Duties. To the fullest extent permitted by applicable law, notwithstanding any other provision of this Agreement or otherwise of applicable law, including any in equity or at law, no Member shall have any fiduciary duty to the DAO or to any Member by reason of this Agreement or in its capacity as a Member, except that the Members shall be subject to the implied contractual covenant of good faith and fair dealing and the terms and provisions of this Agreement. The provisions of this Agreement, to the extent that they restrict or eliminate the duties and liabilities of the Members otherwise existing at law or in equity, are agreed by the parties hereto to replace such other duties and liabilities of the Members. Members will exercise any rights under this Agreement consistent with this Agreement.

13. Intellectual Property Rights.

(a) Grant of Rights. The term of this license begins whenever a contribution is made through the Site by a Person entering into this Agreement as a Member or is subsequently admitted as a Member pursuant to the terms of this Agreement (i.e., any and all Members). "Site" includes the DAO, its affiliate DAOLABS, LLC, the decentralized application(s), Github, Discord, and/or any other means of written or oral communication made to the DAO or its Members.

Contributors to the DAO, with regards to development of its application, with compensation, will execute any agreement for consulting or assignment, along with any innovations via written agreement with the DAO or its affiliate, DAOLABS, LLC³ from which the DAO licenses its Dapp and operating applications.

- **(b) Reservation of Rights.** All rights in any copyrightable works not specifically granted to the DAO are reserved by the Member. Specifically, the DAO acknowledges that its use of the Work will not affect the Member's continued and separate copyright ownership in the Work, and that the Member may use and license others to use the Work otherwise and elsewhere.
- (c) Representations and Warranties, Indemnification. The Member represents and warrants that it is the owner of the entirety of the rights in and to the Work and that the Member has the full authorization and authority to enter into this Agreement and grant the licenses herein. No other rights, permissions, or consents are necessary for the DAO to use the Work in accordance with the licenses granted herein, and no fees, royalties, or use payments of any kind are due to the Member or third parties in connection with the exercise of the licenses granted herein. The Member guarantees that the Work does not infringe any copyright or trademark, and that the Work does not violate any privacy, personal, proprietary, or common law, or statutory right, of any Person. Licensor shall indemnify and hold Licensee (and its agents, Affiliates, assigns, heirs, or other successors in interest) harmless from any claim, loss, liability, damage, or expense (including reasonable attorneys' fees) arising out of any claim, lawsuit, or demand which is inconsistent with or arises out of warranties or representations in this Section.

(d) Limited Field of Use. Notwithstanding the preceding provisions, the DAO shall not use Members' Work for any purposes other those defined in the Grant of Rights 13.(a), which includes use by the DAO within its field of use as defined in its Purpose, in 1. Organization., including for any for-profit endeavors, with the exception, however, of the purposes of any derivative rights by the DAO which it is obligated to grant to DAOLABS, or its affiliates for use of or within the licensed Dapp, and any contributions to the DAO where the DAO compensates the Member for the Work.

14. Derivative Matters.

(a) No Derivative Actions. No Member shall have the right to bring any action or proceeding in any court or before any arbitrator or other tribunal against the DAO or any other Member on account of any alleged or actual breach of this Agreement or any other agreement or instrument to which the DAO is a party or by which it is bound, or for any other purpose whatsoever, except as expressly provided in this Agreement.

15. Amendments.

- (a) Except as otherwise provided herein, the terms and provisions of this Agreement may be amended only with the prior consent of Members acting by a vote via the Dapp.
- (b) Amendments to this Agreement shall be made available via the Dapp.

16. Service Providers.

- **(a) Appointment and Compensation of Service Providers.** The DAO shall have the right to appoint Service Providers to perform administrative services, responsibilities, and duties to carry on the DAO's operations, including maintenance of the Dapp and smart contracts. The DAO shall have the right to provide Service Providers with reasonable compensation.
- **(b) Limitation of Liability.** Notwithstanding anything contained in this Agreement to the contrary, any Service Provider of DAO shall not be liable for any error of judgment, mistake of law, or for any loss suffered by the DAO, its Members, Persons affiliated with the DAO or its Members, or third parties in connection with the matters to which this Agreement relates or for any services provided by a Service Provider, except for a loss resulting from a Service Provider's willful misfeasance, gross negligence, or reckless disregard in the performance of its duties under this Agreement. Furthermore, Service Providers shall not be liable for:

- (i) any action taken or omitted in accordance with or in reliance upon written or oral instructions, advice, data, documents, or information (without investigation or verification) received by Service Providers from any Person;
- (ii) any liability arising from the transfer or use of any Governance Rights or Tokens, including with respect to matters arising under applicable laws or private rights of action; or
- (iii) any action taken or omitted by the DAO, its Members, any affiliated Persons of the DAO or its Members, or any third party.
- **(c) Indemnification.** The DAO shall indemnify and hold harmless the Service Provider, their affiliates, employees, and agents, from and against any and all losses, damages, liabilities, costs, and expenses (including reasonable attorneys' fees) arising out of or in connection with any claim, lawsuit, or demand which arises out of any activities during the period of service to the DAO and from the conclusion of services until the statute of limitations have run for any known or unknown claims. The DAO, its Members, and any contributors to the DAO via the Dapp, the Gnosis Multisignature Wallet, the purchase of NFT, or the receipt of any governance rights from any party or parties shall agree to the indemnification obligation set forth in the attached Agreement as the DAO, on one hand, and the Service Provider, including its affiliates, employees, and agents, on the other hand.
- **(d) Initial Service Provider.** The initial Service Provider shall be the dao-lawfirm.eth, and its affiliates.

17. General Provisions.

- **(a) Notices.** Subject to Section 5, all notices required to be delivered under this Agreement shall be effective only if sent via **Discord, Twitter, or another acceptable communication channel**. In computing the period of time for the giving of any notice, the day on which the notice is given shall be excluded, and the day on which the matter noticed is to occur shall be included. If notice is given via electronic means, by dao-lawfirm.eth, it shall be deemed given when sent, provided that the sending party does not have reason to believe that such notice was not delivered.
- (b) Further Assurance. Each Member agrees to perform all further acts and to execute, acknowledge, and deliver any document (including tax forms and information) that may reasonably be necessary to carry out the provisions of this Agreement.

- (c) Interpretation. Unless otherwise indicated to the contrary herein by the context or use thereof the words, "herein," "hereto," "hereof," and words of similar import refer to this Agreement as a whole and not to any particular section or paragraph hereof; words importing the masculine gender shall include the feminine and neutral genders, and vice versa; and words importing the singular shall include the plural, and vice versa; plural forms of singular defined terms shall have corresponding meanings and singular forms of plural defined terms shall have corresponding meanings; the section headings contained in this Agreement are for reference purposes only and shall not affect the interpretation of this Agreement; references to statutes or regulations include amendments and successor or replacement statutes or regulations.
- **(d) Severability.** If any term or provision of this Agreement or any application of this Agreement shall be declared or held invalid, illegal, or unenforceable, in whole or in part, whether generally or in any particular jurisdiction, such provision shall be deemed amended to the extent, but only to the extent, necessary to cure such an invalidity, illegality, or unenforceability, and the validity, legality, and enforceability of the remaining provisions, both generally and in every other jurisdiction, shall not in any way be affected or impaired thereby.
- **(e) Binding Agreement.** This Agreement shall be binding upon and inure to the benefit of the parties and their respective heirs, executors, administrators, successors, permitted assigns, trustees, and legal representatives.
- **(f) Creditors.** None of the provisions of this Agreement shall be for the benefit of, or enforceable by, any creditor of any Member or of the DAO. No creditor who makes a loan to the DAO may have or acquire, as a result of making the loan, any direct or indirect interest in the DAO's property.
- **(g) Waiver.** Any term or condition of this Agreement may be waived at any time by the party or parties entitled to the benefit thereof, but only by a writing signed by the party or parties waiving such term or condition. No waiver of any provision of this Agreement or of any right or benefit arising hereunder shall be deemed to constitute or shall constitute a waiver of any other provision of this Agreement (whether similar or not), nor shall any such waiver constitute a continuing waiver, unless otherwise expressly so provided in writing.
- **(h) Waiver of Partition; No Bill for DAO Accounting.** Each Member hereby irrevocably waives any and all rights that it may have to maintain an action for partition of any of the DAO's property. Each Member covenants that it shall not file a bill for DAO accounting.
- (i) Limitation of Liability. Except for any remedies that cannot be excluded or limited by law, no party, or its agent, Affiliate, assigns, heirs, or other successors in interest, will be liable under this

Agreement to another party, or that party's agent, Affiliate, assigns, heirs, or other successors in interest, or other third party, for any special, reliance, punitive, indirect, incidental, or consequential damages or lost or imputed profits, lost data, lost property, or any costs and fees. This limitation of liability may not be valid in some jurisdictions. Parties to this Agreement may have rights that cannot be waived under some laws. The DAO and its Members do not seek to limit the DAO's or Members' warranties or remedies to any extent not permitted by law.

YOU UNDERSTAND AND AGREE THAT, TO THE FULLEST EXTENT PROVIDED BY LAW, IN NO EVENT SHALL THE DAO OR ITS MEMBERS BE LIABLE FOR ANY LOSS OF PROFITS, REVENUE OR DATA, INDIRECT, INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES, OR DAMAGES OR COSTS DUE TO LOSS OF PRODUCTION OR USE, BUSINESS INTERRUPTION, OR PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES, IN EACH CASE WHETHER OR NOT THE DAO OR ITS MEMBERS HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, ARISING OUT OF OR IN CONNECTION WITH THE AGREEMENT OR ANY COMMUNICATIONS, INTERACTIONS OR MEETINGS WITH OTHER USERS OF THE DAO, ON ANY THEORY OF LIABILITY, RESULTING FROM: (a) THE USE OR INABILITY TO USE THE DAO DAPP; (b) THE COST OF PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES RESULTING FROM ANY GOODS, DATA, INFORMATION OR SERVICES PURCHASED OR OBTAINED; OR MESSAGES RECEIVED FOR TRANSACTIONS ENTERED INTO THROUGH THE DAO DAPP; (c) UNAUTHORIZED ACCESS TO OR ALTERATION OF YOUR TRANSMISSIONS OR DATA; (d) STATEMENTS OR CONDUCT OF ANY THIRD PARTY IN THE DAO; OR (e) ANY OTHER MATTER RELATED TO THE DAO DAPP, WHETHER BASED ON WARRANTY, COPYRIGHT, CONTRACT, TORT (INCLUDING NEGLIGENCE), PRODUCT LIABILITY OR ANY OTHER LEGAL THEORY.

- (j) Governing Law; Jurisdiction; Venue. Notwithstanding the place where this Agreement may be executed by any of the parties hereto, the parties expressly agree that all of the terms and provisions hereof shall be construed in accordance with and governed by the laws of the State of Delaware, without giving effect to the principles of choice or conflicts of laws thereof that would require that this Agreement be governed by the laws of another state. Each of the parties hereto consents and agrees to the exclusive personal jurisdiction of any state or federal court sitting in Delaware, and waives any objection based on venue or forum non conveniens with respect to any action instituted therein, and agrees that any dispute concerning the conduct of any party in connection with this Agreement shall be heard only in the courts described above.
- **(k) Arbitration.** In consideration of the promises in this agreement, the parties agree that any and all controversies, claims, or disputes with anyone (including the DAO and any employee, officer, director, shareholder or benefit plan of the company in their capacity as such or otherwise) arising out of, relating to, or resulting from this Agreement, shall be subject to binding arbitration under

the arbitration rules set forth in Delaware law and thereby agrees to waive any right to a trial by jury, include any statutory claims under state or federal law, including, but not limited to, claims under Title VII of the Civil Rights Act of 1964, the Americans with Disabilities Act of 1990, the Age Discrimination in Employment Act of 1967, the Older Workers Benefit Protection Act, the Worker Adjustment and Retraining Notification Act, discrimination or wrongful termination and any statutory claims. The parties further understand that this Agreement to Arbitrate also applies to any disputes that the DAO may have with a Member.

- (I) Procedure. The parties agree that any arbitration will be administered by the American Arbitration Association ("AAA") and that the neutral arbitrator will be selected in a manner consistent with its national rules for the resolution of employment disputes. The parties agree that the Arbitrator shall have the power to decide any motions brought by any party to the arbitration, including motions for summary judgment and/or adjudication and motions to dismiss and demurrers, prior to any arbitration hearing. The parties also agree that the arbitrator shall have the power to award any remedies, including attorneys' fees and costs, available under applicable law. The parties understand that they shall share equally in paying for the administrative or hearing fees charged by the arbitrator or AAA. The parties agree that the Arbitrator shall administer and conduct any arbitration in a manner consistent with the rules and that to the extent that the AAA's national rules for the resolution of employment disputes conflict with the rules, the rules shall take precedence. The parties agree that the decision of the Arbitrator shall be in writing.
- (m) Covenant Not to Sue." The Members hereby agree and understand that by signing this agreement they hereby waive any right to sue other Members or the DAO for any reason and at any time. In the event that a Member attempts to file suit against either another Member or the DAO, that Member's ownership interest shall be cancelled and he shall be refunded any money or other assets he personally contributed to the DAO, but shall not be entitled to any increase in value or other profit earned by the DAO. Solely the Service Provider shall be empowered to determine if a Member is entitled to any other remuneration upon the cancellation of his ownership interest. Consistent with Section 6, the Service Provider is solely authorized and empowered to make such a determination, and there is no right of appeal or other objection to the determination of the Service Provider. The DAO, Members and the Service Provider covenant that under no conditions will any party or any affiliate file any action against the other (except requests for injunctive or other equitable relief only) in any forum, but instead agree to resolve any disagreement regarding the implementation of the Agreement or an alleged breach by a party by mandatory arbitration. The parties further choose to use Washington Arbitration and Mediation Services ("WAMS") in Seattle, Washington, as the agreed arbitrator in this matter. Each party may request arbitration of any dispute by sending notice to the other party, in writing, of the demand for arbitration.

In the event of any arbitration of a dispute between the parties, the DAO agrees to pre-pay, after notice of arbitration has been sent, \$500,000.00 (half-million, \$500,000.00 USD) to the Service Provider or to the affiliate's choice. Following arbitration, the arbitrator may award attorney's fees to the prevailing party, including the reimbursement of any attorney's fees that were pre-paid in the dispute.

- **(n) Entire Agreement.** This Agreement (including the exhibits hereto) supersedes any and all other understandings and agreements, either oral or in writing, among the parties with respect to the subject matter hereof and constitutes the sole agreement among the parties with respect thereto, including but not limited to the Original Agreement.
- **(o) Amendment.** This Agreement may not be amended, modified, or revoked, in whole or in part, nor may any provisions be waived, except via a vote occurring through the Dapp.
- (p) Securities Laws Matters. THE TOKENS HAVE NOT BEEN REGISTERED UNDER THE SECURITIES ACT OF 1933, AS AMENDED, STATE SECURITIES LAWS, OR THE LAWS OF ANY COUNTRY OUTSIDE THE UNITED STATES. THEY PROVIDE NO RIGHT TO ANY PROFITS OR LOSSES OF THE DAO, NOR IS THERE A REASONABLE EXPECTATION OF PROFIT FROM BUYING OR RECEIVING THE TOKENS. THE TOKENS ONLY PROVIDE THE HOLDER WITH GOVERNANCE RIGHTS THAT ARE SPECIFICALLY LIMITED IN THIS AGREEMENT.
- (q) Communication by Electronic Means. Unless otherwise required by law or by agreement, any notice, vote, consent, petition, or other oral or written communication required or permitted can be delivered by electronic means, provided that, in the case where such communication expressly or impliedly requires the signature of the person submitting the communication, means are in place to reasonably assure the authenticity of the signature, including Cryptographic signatures. For the purposes of notice or any communications pertaining to this Agreement, Members may deliver electronic correspondence, *in addition, to other means*, to 0x5d95baEBB8412AD827287240A5c281E3bB30d27E@ethmail.cc or 0x752515a3A1091b9f1c04416CF79D1F14d2340085@ethmail.cc.

3. Risks Involved in the Use of the Smart Contracts.

The DAO protocol runs entirely on publicly accessible smart contracts explained in detail throughout the Juicebox DAO's online documents, currently available at https://info.juicebox.money. The Juicebox DAO's protocol is public infrastructure running well-known code. All consequences from interacting with networks running the protocol are borne by the entities who sign each transaction. The protocol works according to the specifications outlined in these docs to the extent the code is written and deployed correctly, which is a collective responsibility and is not guaranteed. There are major risks that the code is not written and deployed correctly. **Please do your own research.**

4. Source Code Repositories.

No Warranties. The DAO's source code Repository is only a presentation of information regarding certain view points and technologies. The statements contained in the Repository do not provide any advice, representation, warranty, certification, guarantee or promise relating to these technologies, any uses thereof or any of the other matters discussed in the Repository, nor does the Repository provide an offer or agreement to make such technologies available, maintain or update such technologies, or sell or buy any asset or enter into any transaction. You should not rely on the Repository as a basis for making any financial or other decision.

5. Intellectual Property.

- **2. Your Content.** The DAO does not claim ownership of Your Content. However, when you as a Registered User post or publish Your Content on or in the DAO Properties, you represent that you own and/or have a royalty-free, perpetual, irrevocable, worldwide, non-exclusive right (including any moral rights) and license to use, license, reproduce, modify, adapt, publish, translate, create derivative works from, distribute, derive revenue or other remuneration from, and communicate to the public, perform and display Your Content (in whole or in part) worldwide and/or to incorporate it in other works in any form, media or technology now known or later developed, for the full term of any worldwide intellectual property right that may exist in Your Content.
- 3. License to Your Content. Subject to any applicable account settings that you select, you grant the DAO a fully paid, royalty-free, perpetual, irrevocable, worldwide, royalty-free, non-exclusive and fully sublicensable right (including any moral rights) and license to use, license, distribute, reproduce, modify, adapt, publicly perform, and publicly display Your Content (in whole or in part) for the purposes of operating and providing the DAO Properties to you and to our other Registered Users. Please remember that other Registered Users may search for, see, use, modify and reproduce any of Your Content that you submit to any "public" area of the DAO Properties. You warrant that the holder of any worldwide intellectual property right, including moral rights, in Your Content, has completely and effectively waived all such rights and validly and irrevocably granted to you the right to grant the license stated above. You may not post or submit for print services a photograph of another person without that person's permission.

6. The Decentralized Application.

The DAO provides access to a DAPP, a decentralized finance application, ("Application") on the Ethereum blockchain that allows individuals to contribute Ethereum assets including Ethereum, ERC-PLAINTIFF0000213

https://gov.move.xyz/tos/ 5/18

20, ERC-721, and other Ethereum-based assets ("Cryptocurrency Assets") to the DAO Treasury as contributions. The Application may be configured as to emit project tokens ("Project Tokens") which may or may not have utility. The Application spans a front-end application, middleware (including Interplanetary File System metadata, Graph indexers, Blocknative API functions, Infura services, Cloud Functions, etc.) and an array of Ethereum smart contracts - the user is required to authorize the execution of the Smart Contracts when interacting with their wallet at all times.

Using the DAO protocol may require that you pay a fee, such as gas fees on the Ethereum network, to perform a transaction. You acknowledge and agree that the DAO has no control over any transactions among Users over the DAO's protocol, or the method of payment of any such transactions or any actual payments of such transactions. Accordingly, you must ensure that you have a sufficient balance of the applicable cryptocurrency tokens stored at your DAO protocol-compatible wallet address ("Cryptocurrency Wallet") to complete any such transaction on the DAO protocol or the Ethereum network before initiating such a transaction.

7. Access to the DAO Application.

Access to the Site is provided on an "AS IS" and "as available" basis only. We do not guarantee that the Site, or any content on it, will always be available or uninterrupted. From time to time, access may be interrupted, suspended, or restricted, including because of a fault, an error, or unforeseen circumstances, or because we are carrying out planned maintenance. With regards to the Sites; We reserve the right to limit the availability of the Site to any person, geographic area or jurisdiction we so desire and/or to terminate your access to and use of the Site, at any time and in our sole and absolute discretion. We may remove or amend the content of the Site at any time. Some of the Site content may be out of date at any given time and we are under no obligation to update it. You acknowledge that the DAO has no obligation to pre-screen Content (including, but not limited to, User Content), although the DAO reserves the right in its sole discretion to pre-screen, refuse or remove any Content. By entering into the Agreement, you hereby provide your irrevocable consent to such monitoring. You acknowledge and agree that you have no expectation of privacy concerning the transmission of Your Content, including without limitation chat, text, or voice communications. In the event that the DAO pre-screens, refuses or removes any Content, you acknowledge that the DAO will do so for the DAO's benefit, not yours. Without limiting the foregoing, The DAO shall have the right to remove any Content that violates the Agreement or is otherwise objectionable.

- 12. post content on the Site containing unsolicited promotions, commercial messages, or any chain messages or user content designed to deceive or trick the user of the Site; or
- 13. encourage or induce any third party to engage in any of the activities prohibited under these Terms.

You acknowledge that the Site and your use of the Site contain certain risks, including, without limitation, the following risks:

- 1. that any Smart Contracts you interact with are entirely your own responsibility and liability;
- 2. that at any time, your access to your Cryptocurrency Assets may be suspended or terminated or there may be a delay in your access or use of your Cryptocurrency Assets which may result in the Cryptocurrency Assets diminishing in value or you being unable to complete a transaction or interact with a Smart Contract; and
- 3. That the Site and/or application may be suspended or terminated for any or no reason, which may limit your access to your Cryptocurrency Assets.

Feedback. You agree that submission of any ideas, suggestions, documents, and/or proposals to the DAO through its suggestion, feedback, wiki, forums (e.g. Discord or Snapshot), or similar pages ("Feedback") is at your own risk and that the DAO has no obligations (including without limitation obligations of confidentiality) with respect to such Feedback. You represent and warrant that you have all rights necessary to submit the Feedback. "Not an Invitation to Invest or Purchase."

No reliance should be placed on any statements, rankings or ratings on the DAO Properties, whether for investment purposes or otherwise.

9. OFAC Compliance.

The U.S. Department of Treasury, through the Office of Foreign Assets Control ("OFAC"), prohibits U.S. companies from engaging in all or certain commercial activities with certain sanctioned countries (each a "Sanctioned Country") and certain individuals, organizations, or entities, including, without limitation, certain "Specially Designated Nationals" ("SDN") listed by OFAC. If you use the Site, you expressly represent that you are not located in a Sanctioned Country and are not listed as an SDN. If the DAO determines that the Site is being used by prohibited persons, it will take any and all actions to terminate that User's access to the Site.

10. Third Party Links.

The Site may contain hyperlinks or references to third party websites. Any such hyperlinks or references are provided for your information and convenience only. We have no control over third party websites and accept no legal responsibility for any content, material, or information contained **PLAINTIFF0000218**

in them. The display of any hyperlink and reference to any third-party website does not mean that we endorse that third party's website, products, or services. Your use of a third-party site may be governed by the terms and conditions of that third-party site.

11. Privacy Policy.

Certain areas of the Site or Application, including any and all interactions with the Ethereum blockchain, record your Cryptocurrency address and details of the transactions you authorize. You understand that transactions, including parties you transact with, specific Cryptocurrency Assets you hold, including unique ENS domain NFTs, third-party NFTs, the Cryptocurrency address, metadata associated with any Smart Contract such as the executing function, its arguments (or parameters) will contain in aggregate information which *may* identify you personally.

The Ethereum blockchain transactions are not temporary or transient, but are permanently and permissionlessly accessible. The DAO, its contributors, and its affiliates are not engaged in profiling activities whatsoever; however, *any other* third party, including government agencies and/or foreign adversaries, will have unfettered access to all of your transactions on the blockchain forever.

Your authorization of transactions with your Cryptocurrency address, using Cryptocurrency Tokens, will result in the indelible dissemination of information to the Ethereum blockchain.

Notwithstanding, the Application, handles as little personal information as possible, only your Cryptographic address. With regards to transaction with the Application, including any payments or transfer of funds, any information you provide to the payment vendors we do not retain, have access to or control; your authorization of any payment or execution of transactions you provide to the site is voluntary, and final.

Additionally, the Sites may employ Fathom Analytics for website traffic analytics, which doesn't use cookies and complies with the GDPR, ePrivacy (including PECR), COPPA and CCPA. The decision to potentially use this privacy-friendly analytics software, was in large part to ensure your IP address is only briefly processed by this 3rd party, and the DAO and the Site have no way of identifying you (aside from the aforementioned indelible entire history of Cryptographic transactions). As per the CCPA, your personal information is de-identified.

The purpose of the DAO potentially using Fathom Analytics is to understand the Application website traffic in the most privacy-friendly way possible so that the DAO can continually improve the Application. The lawful basis as per the GDPR is "Article 6(1)(f); where our legitimate interests are to improve our website and business continually." Additionally, the DAO and its contributors have no interest in collecting this information.

13. Indemnification.

You agree to indemnify and hold the DAO and its parents, subsidiaries, affiliates, officers, employees, agents, partners, suppliers, and licensors (each, a "DAO Party" and collectively, the "DAO Parties") harmless from any losses, costs, liabilities, and expenses (including reasonable attorneys' fees) relating to or arising out of any and all of the following: (a) Your Content; (b) your use of, or inability to use, any DAO Property; (c) your violation of the Agreement; (d) your violation of any rights of another party, including any Registered Users; or (e) your violation of any applicable laws, rules, or regulations. The DAO reserves the right, at its own cost, to assume the exclusive defense and control of any matter otherwise subject to indemnification by you, in which event you will fully cooperate with the DAO in asserting any available defenses. This provision does not require you to indemnify any of the DAO Parties for any unconscionable commercial practice by such party or for such party's fraud, deception, false promise, misrepresentation, or concealment, or suppression or omission of any material fact in connection with the Website or any Services provided hereunder. You agree that the provisions in this section will survive any termination of your Account, the Agreement, and/or your access to the DAO Properties.

14. Arbitration.

Informal Negotiations. To expedite resolution and control the cost of any dispute, controversy or claim arising under or related to your account, the DAO protocol or Application, the Site, these Terms, or any other transaction involving you and the DAO, whether in contract, warranty, misrepresentation, fraud, tort, intentional tort, statute, regulation, ordinance, or any other legal or equitable basis (or the breach, termination, enforcement, interpretation or validity thereof) ("Dispute"), you and the DAO agree to first attempt to negotiate any Dispute (except those Disputes expressly provided below) informally for at least ninety (90) days before initiating any arbitration. Such informal negotiations commence upon written notice from one person to the other. You should send your notice in an appropriate Discord channel via https://discord.gg/movexyz or via a message on https://chat.blockscan.com addressed to the DAO Gnosis multi-signature address 0x143cC0A996De329C1C5723Ee4F15D2a40c1203c6 ("Notice Address"). The DAO will send its notice to you by the Discord handle provided by you in connection with the aforementioned notice or to the Cryptographic address used in connection with the Application via the aforementioned https://chat.blockscan.com/.

Binding Arbitration. If you and the DAO are unable to resolve a Dispute through informal negotiations, either you or the DAO may elect to have the Dispute (except those Disputes expressly excluded below) finally and exclusively resolved by confidential binding arbitration, and not in a class, representative or consolidated action or proceeding. In such event, these Terms memorialize a transaction in interstate commerce; (i) the Federal Arbitration Act (9 U.S.C. § 1, et seq.) governs the

interpretation and enforcement of this Section; and (ii) this Section shall survive termination of these Terms.

Any election to arbitrate by one party shall be final and binding on the other, and your grounds for appeal are limited. YOU UNDERSTAND THAT ABSENT THIS PROVISION, YOU WOULD HAVE THE RIGHT TO SUE IN COURT AND HAVE A JURY TRIAL. The arbitrator may award you the same damages and relief as a court sitting in proper jurisdiction could, and may award declaratory or injunctive relief. In addition, in some instances, the costs of arbitration could exceed the costs of litigation and the right to discovery may be more limited in arbitration than in court. The arbitration shall be commenced and conducted under the Commercial Arbitration Rules of the American Arbitration Association ("AAA") and, where appropriate, the AAA's Supplementary Procedures for Consumer Related Disputes ("AAA Consumer Rules"), both of which are available at the AAA website. The determination of whether a Dispute is subject to arbitration shall be governed by the Federal Arbitration Act. The parties agree that the arbitrator shall have exclusive authority to decide all issues relating to the interpretation, applicability, enforceability and scope of this arbitration agreement. Your arbitration fees and your share of arbitrator compensation shall be governed by the AAA Rules and, where appropriate, limited by the AAA Consumer Rules. If such costs are determined by the arbitrator to be excessive, you will pay all arbitration fees and expenses. The arbitration may be conducted, at the option of the claimant, either in person or by video conference. The arbitrator will make a decision in writing, but need not provide a statement of reasons unless requested by a party. The arbitrator must follow applicable law, and any award may be challenged within a reasonable period of time (not to exceed 30 days) if the arbitrator fails to do so. Except as otherwise provided in this Agreement, you and the DAO may litigate in court to compel arbitration, stay proceedings pending arbitration or to confirm, modify, vacate or enter judgment on the award entered by the arbitrator. Judgment upon any award rendered by the arbitrator(s) may be entered and enforcement obtained thereon in any court having jurisdiction. All arbitration proceedings shall be closed to the public and confidential and all records relating thereto shall be permanently sealed, except as necessary to obtain court confirmation of the arbitration award. Each party shall have the right to participate by video conference in order to minimize travel and expense burdens. Subject to the terms and conditions of these Terms, the arbitrator shall have authority to grant any form of appropriate relief, whether legal or equitable in nature, including specific performance.

Restrictions/No Class Actions. You and the DAO agree that any claim brought in connection with a Dispute, whether resolved through arbitration or not, will be brought between the DAO and you individually, and that you may not assert any such claim against the DAO as plaintiff or class Member in any purported class or representative proceeding. To the fullest extent permitted by law, (1) no arbitration shall be joined with any other; (2) no Dispute between you and the DAO is to be

arbitrated on a class-action basis or will utilize class action procedures; and (3) you may not bring any Dispute in a purported representative capacity on behalf of the general public, other Users of the Site or any other persons. If this specific provision is determined to be unenforceable, then the entirety of this Arbitration section will be null and void.

Exceptions to Informal Negotiations and Arbitration. You and the DAO agree that the following Disputes are not subject to the above provisions concerning informal negotiations and binding arbitration:

(1) any Disputes seeking to enforce or protect, or concerning the validity of, any of your or the DAO's intellectual property rights; and (2) any claim for injunctive relief.

Effect of Changes on Arbitration. Notwithstanding the provisions of these Terms, if the DAO changes any of the terms of this Arbitration section after the date you first accepted these Terms (or accepted any subsequent changes to these Terms), you may reject any such change by sending us written notice (including by electronic mail to the aforementioned Notice Address via https://chat.blockscan.com/) within 30 days of the date such change became effective, as indicated in the "Last Updated" date above or in the date of the DAO's email to you notifying you of such change (whichever is earlier). By rejecting any change, you are agreeing that you will arbitrate any Dispute between you and the DAO in accordance with the terms of this Arbitration section as of the date you first accepted these Terms (or accepted any subsequent changes to these Terms.

Small Claims Court. Notwithstanding the foregoing, you may bring an individual action in the small claims court of your state or municipality if the action is within that court's jurisdiction and is pending only in that court.

Release. You hereby release the DAO, affiliates, Service Provider, and their successors from claims, demands, any and all losses, damages, rights, and actions of any kind, including personal injuries, death, and property damage, that is either directly or indirectly related to or arises from your use of the DAO DAPP, including but not limited to, any use of any information, ratings, rankings, scores, tips, or advice Made Available via the DAO DAPP and any reliance thereon, of any kind arising in connection with or as a result of the Agreement or your use of the DAO DAPP. If you are a California resident, you hereby waive California Civil Code Section 1542, which states, "A general release does not extend to claims that the creditor or releasing party does not know or suspect to exist in his or her favor at the time of executing the release and that, if known by him or her, would have materially affected his or her settlement with the debtor or released party." The foregoing release does not apply to any claims, demands, or any losses, damages, rights, and actions of any kind, including personal injuries, death, or property damage for any unconscionable commercial practice

by a DAO Party or for such party's fraud, deception, falsehood, promise, misrepresentation, or concealment, suppression, or omission of any material fact in connection with the DAPP or the DAO Site or any Services provided hereunder.

15. Governing Law.

These Terms and all aspects of your use of the Site shall be governed by and construed in accordance with the internal laws of the *United States and the State of Delaware* governing contracts entered into and to be fully performed in Delaware (i.e., without regard to conflict of law's provisions) regardless of your location except that the Arbitration section above shall be governed by the Federal Arbitration Act. For the purpose of any judicial proceeding to enforce an arbitration award or incidental to such arbitration or to compel arbitration, or if for any reason a claim proceeds in court rather than in arbitration, you hereby submit to the non-exclusive jurisdiction of the state and Federal courts sitting in Georgetown, Delaware, and agree that service of process in such arbitration or court proceedings shall be satisfactorily made upon a party if sent by certified, express or registered mail addressed to it at the address set forth in the books and records of the DAO, or if no such address has been provided, by email to the email address, or by notice via Discord, or by the aforementioned chat to the Notice Address provided by the relevant party to the DAO in connection with its use of the Site. With respect to any Disputes not subject to informal dispute resolution or arbitration (as set forth above), you agree not to commence or prosecute any action in connection therewith other than in the state and Federal courts located in Georgetown, Delaware, and you hereby consent to, and waive all defenses of lack of personal jurisdiction and forum non conveniens with respect to, venue and jurisdiction in the state and Federal courts located in Georgetown, Delaware. To the extent non-U.S. laws mandate a different approach with respect to governing law, venue, statute of limitation, and dispute resolution method with respect to certain non-U.S. persons, each such required standard shall be applied, but all other provisions under this section shall remain in full force.

16. General.

If any clause or part of any clause of these Terms is found to be void, unenforceable or invalid, then it will be severed from these Terms, leaving the remainder in full force and effect, provided that the severance has not altered the basic nature of these Terms.

No single or partial exercise, or failure or delay in exercising any right, power or remedy by us shall constitute a waiver by us of, or impair or preclude any further exercise of, that or any right, power or remedy arising under these terms and conditions or otherwise.

If any of the provisions in these Terms are found to be illegal, invalid or unenforceable by any court of competent jurisdiction, the remainder shall continue in full force and effect.

The DAO shall not be liable for any unforeseeable event beyond its reasonable control not caused by its fault or negligence (each, a "force majeure event"), which causes the DAO to be unable to perform its obligations under these Terms, and which it has been unable to overcome by the exercise of its due diligence, provided that the DAO shall use reasonable efforts to avoid or remove such causes of nonperformance, shall suspend performance only for such period of time as is necessary as a result of such force majeure event and shall resume performance as quickly as reasonably possible.

All disclaimers, indemnities and exclusions in these Terms shall survive termination of the Terms and shall continue to apply during any suspension or any period during which the Site is not available for you to use for any reason whatsoever.

These Terms and the documents referred to in them set out the entire agreement between you and us with respect to your use of the Site, the DAO and the services provided via the Site and supersede any and all prior or contemporaneous representations, communications or agreements (written or oral) made between you or us.

Transgression: A violation of the DAO's Code of Conduct, either through a single incident or a series of actions.

Consequence: A warning describing the consequences for continued inappropriate behavior. No interaction shall take place with the people involved (including unsolicited interaction with those enforcing the Code of Conduct) for 72 hours. This includes interactions in Community spaces, as well as interactions through external channels like Telegram, Discord, Reddit, a Community Forum, or another platform. Violating these terms may lead to a temporary or permanent ban.

3. Temporary Ban.

Transgression: A serious violation of Community standards, including sustained inappropriate behavior.

Consequence: A temporary ban from any sort of interaction or communication with the Community for 168 hours. Definitions

A "51% attack" is a type of attack on a decentralized network whereby a group gains control of the majority of nodes. A 51% attack would such a group to defraud the blockchain by reversing transactions and "double spending" Ether and other tokens.

An "Account" is an object containing an address, balance, nonce, and optional storage and code. An account can be a contract account or an externally owned account (EOA).

"Act" or "The Act" refers to the Delaware Uniform Unincorporated Nonprofit Association Act, Del. Code Ann. Tit. 6, §§ 1901-1916 inclusive.

"Address" most generally, represents an EOA or contract that can receive ("destination address") or send ("source address") transactions on the blockchain. More specifically, it is the rightmost 160 bits of a Keccak hash of an ECDSA public key.

"Affiliate" means, with respect to any Person, any other Person controlling, controlled by, or under common control with such Person; in such context, "control" means the possession, directly or indirectly, of the power to direct the management or policies of another, whether through the ownership of voting securities, by contract, or otherwise.

"Agreement" or "The Agreement" refers to the Guiding Principles Agreement of the DAO.

"Allow Minting Tokens", "Allow Changing Tokens", "Allow Setting Terminals", "Allow Setting the Controller", "Allow Terminal Migrations", and "Allow Controller Migration" each refer to different Juicebox protocol functions which Juicebox Projects can enable or disable each Funding Cycle. By default, these functions are disabled.

"Amendments" conveys that any provision of this Charter may be amended, waived or modified only upon a vote in favor of such amendment, waiver or modification by the DAO Members through the Designated Smart Contract.

"Application Binary Interface (ABI)" is the standard way to interact with contracts in the Ethereum ecosystem, both from outside the blockchain and for contract-to-contract interactions.

"Audit" refers to a testing process for potential security improvements or other improvements to a new token, project, product, or offering, or for potential improvements to an existing token, project, product, or offering. Testing networks ("Testnets" or "Test nets") can be used to test the viability and vulnerability of new ideas, concepts, code, and processes before those ideas, concepts, code, or processes are deployed to other networks.

"Ballot" or "Reconfiguration Ballot" refers to Ethereum Smart Contracts which adhere to [I]BFundingCycleBallot. Ballots specify the conditions that must be met for any proposed funding cycle reconfiguration to take effect. A Ballot can be written to incorporate strict community voting requirements in order to make funding cycle changes, or to simply add a required buffer period between when a change is proposed and when it can take effect.

"Ballot Redemption Rate" refers to a custom Redemption Rate (See Redemption Rate) which overrides the typical Redemption Rate if a Reconfiguration Ballot is currently active.

"Claim" means any past, present, or future dispute, claim, controversy, demand, right, obligation, liability, action, or cause of action of any kind or nature.

"Consensus Attack" refers to an attack that: (i) is undertaken by or on behalf of a block producer who controls, or a group of cooperating block producers who collectively control a preponderance of the means of block production on the Designated Blockchain Network; and (ii) has the actual or intended effect of: (A) reversing any transaction made to or by the Designated Smart Contract after Confirmation of such a transaction, including any "double spend" attack having or intended to have such effect; or (B) preventing inclusion in blocks or Confirmation of any transaction made to or by the Designated Smart Contract, including any "censorship attack," "transaction withholding attack" or "block withholding attack" having or intended to have such effect.

"Consensus Rules" means the rules for transaction validity, block validity, and determination of the canonical blockchain that are embodied in the Designated Client.

"Confirmation" of a transaction shall be deemed to have occurred if and only if such transaction has been recorded in accordance with the Consensus Rules in a valid block whose hashed header is referenced by at least 30 subsequent valid blocks on the Designated Blockchain.

"Construction": Any rule of construction to the effect that ambiguities are to be resolved against the drafter shall not be applied in the construction or interpretation of this Charter. This Charter constitutes the entire agreement among the DAO Members with respect to the subject matter

hereof and supersedes all prior agreements and understandings, both written and oral, among the DAO Members with respect to the subject matter hereof.

- "Contract" means any: (i) written, oral, implied by course of performance or otherwise or other agreement, contract, understanding, arrangement, settlement, instrument, warranty, license, insurance policy, benefit plan or legally binding commitment or undertaking; or (ii) any representation, statement, promise, commitment, undertaking, right or obligation that may be enforceable, or become subject to an Order directing performance thereof, based on equitable principles or doctrines such as estoppel, reliance, or quasi-contract.
- **"DAO"** means Decentralized Autonomous Organization. "DAO" or "The DAO" may refer to Movement DAO, a Delaware Unincorporated Nonprofit Association. The DAO may choose to follow the Unincorporated Nonprofit Association Act under Nevada, Delaware, Washington or another state where the Uniform Unincorporated Nonprofit Association Act of 2008 was adopted.
- "DAO Expenses" refers to costs and expenses related to the activities, maintenance and operation of the DAO. See Section 7(b)(i) of The Agreement.
- "DAO Property" means any Token or other asset, right or property licensed to or on deposit with or owned, held, custodied, controlled or possessed by or on behalf of the DAO, including any Token on deposit with or held, controlled, possessed by or on deposit with the Designated Smart Contract.
- "Dapp" refers to online portals or other interactive software used by the DAO, individuals, and any other entities to create, manage, contribute to, or otherwise interact with Juicebox Treasuries, the Juicebox Protocol, or any other DAO services. Governance activities performed within the DAO's Snapshot Spaces on Snapshot.org or other Snapshot servers are also considered to be Dapp activities.
- "Data Source" refers to Ethereum Smart Contracts which adhere to <code>IJBFundingCycleDataSource</code>. A Data Source can customize what happens when a payment to a Juicebox Project is attempted during a Funding Cycle, and what happens when a Token redemption is attempted during a Funding Cycle.
- "Discount Rate" refers to the percent by which to automatically decrease the subsequent cycle's Weight from the current cycle's Weight. The Discount Rate is not applied during funding cycles where the Weight is explicitly reconfigured.
- "Disputes"; "Mandatory Arbitration". Any Legal Proceeding, Claim or other dispute or controversy arising out of or relating to this Agreement, its enforcement, or the breach thereof shall PLAINTIFF0000235

be finally resolved by binding arbitration in accordance with the Arbitration Procedures; provided, however, that any DAO Member may seek injunctive relief in aid of arbitration in order to prevent irreparable harm or preserve the status quo. EACH DAO MEMBER HEREBY IRREVOCABLY WAIVES ALL RIGHT TO TRIAL BY JURY IN ANY ACTION, PROCEEDING OR COUNTERCLAIM WHETHER BASED ON CONTRACT, TORT OR OTHERWISE) ARISING OUT OF OR RELATING TO THIS CHARTER, THE DESIGNATED SMART CONTRACT, THE DAO MATTERS OR THE ACTIONS OF THE DAO MEMBERS IN THE NEGOTIATION, ADMINISTRATION, PERFORMANCE AND ENFORCEMENT OF THIS AGREEMENT.

- "Distribution Limit" and "Funding Target" refer to the amount of tokens that a Juicebox Project can distribute per Funding Cycle, and the currency which that amount is denominated in.
- "Designated Blockchain" refers to, at any given time, the version of the digital blockchain ledger that at least a majority of nodes running the Designated Client on the Designated Blockchain Network recognize as canonical as of such time in accordance with the Consensus Rules. For the avoidance of doubt, the "Designated Blockchain" does not refer to e.g. Ethereum Classic or any digital blockchain ledger commonly known as a "testnet".
- "Designated Blockchain Network" means the Ethereum mainnet (networkID:1, chainID:1), as recognized by the Designated Client.
- "Designated Client" means the Official Go Ethereum client available at https://github.com/ethereum/go-ethereum, Infura, Alchemy, or other providers, as long as it is compatible with the aforementioned Designated Blockchain Network.
- "Designated Smart Contract" means the smart contracts referenced in contract addresses on the Designated Blockchain.
- "Distributed DAO Property" means any asset, right or property that was once DAO Property and has been distributed to a DAO Member.
- "Established Practices" refers to the practices used by an unincorporated nonprofit association without material change during the most recent five years of its existence, or if it has existed for less than five years, during its entire existence.
- **"Externally Owned Accounts (EOAs)"** are accounts that are controlled by users who control the private keys for an account, typically generated using a seed phrase. Externally owned accounts are accounts without any code associated with them. Typically these accounts are used with a wallet.

"Fraud Proof" is a security model for certain layer 2 solutions where, to increase speed, transactions are rolled up into batches and submitted to Ethereum in a single transaction. They are assumed valid but can be challenged if fraud is suspected. A Fraud Proof will then run the transaction to see if fraud took place. This method increases the amount of transactions possible while maintaining security. Some rollups use validity proofs.

"Funding Cycle Duration" is how long each funding cycle lasts (specified in seconds). All funding cycle properties are unchangeable while that cycle is in progress. In other words, any proposed reconfigurations can only take effect during a subsequent cycle. If no reconfigurations were submitted by the project owner, or if the proposed changes fail the current funding cycle's Ballot, a copy of the latest funding cycle will automatically start once the current one ends. Funding cycle changes pursuant to a Discount Rate or other certain onchain parameters will still take effect in such a funding cycle. A cycle with no duration lasts indefinitely, and reconfigurations can start a new funding cycle with the proposed changes right away.

"Funding Cycle" and "Cycle" refer to the time-locked rules according to which a Juicebox Project wishes to operate. Funding Cycles are typically represented as a <code>JBFundingCycle</code> data structure, and are usually managed by the <code>JBFundingCycleStore</code> contract. Funding Cycle duration can be specified in seconds ("Funding Cycle Duration"). Funding Cycle properties are unchangeable while the cycle is in progress. In other words, any proposed reconfigurations can only take effect during the subsequent cycle. If no reconfigurations were submitted by the Project Owner, or if proposed changes fail the current cycle's Ballot, a copy of the latest Funding Cycle will automatically start once the current one ends. Funding cycle changes pursuant to a Discount Rate or other certain onchain parameters will still take effect in such a funding cycle. A Funding Cycle with no duration lasts indefinitely; valid reconfigurations to Funding Cycles with no duration immediately start a new Funding Cycle with the proposed changes once approved by a Reconfiguration Ballot if necessary.

"Gas" A virtual fuel used in Ethereum to execute smart contracts. The EVM (i.e. the Ethereum Virtual Machine) uses an accounting mechanism to measure the consumption of gas and limit the consumption of computing resources (see Turing complete).

"Governing Principles" refers to the agreements, whether oral, in a record, or implied from established practices, or in any combination thereof, which govern the purpose or operation of an unincorporated nonprofit association and the rights and obligations of its Members and managers. The term includes any amendment or restatement of the agreements constituting the Governing Principles.

"Governance Rights" are the entire interest of a Member in the DAO, as measured by a Member's Tokens, including, without limitation, all rights and obligations contemplated or agreed to under this Agreement, and any right to vote on, consent to, or otherwise participate in any decision or action of or by the Members granted by this Agreement or the Act. Member's Governance Rights are subject to DAO Governance.

"Gnosis Safe" refers to the Gnosis Safe Multisig Wallet, a smart contract which allows multiple Ethereum addresses to manage a single Ethereum address. The Gnosis Safe is used to manage the DAO's treasury.

"Gwei" is short for gigawei, a denomination of ether, commonly utilized to convey gas prices. 1 gwei = 109 wei. 109 gwei = 1 Ether.

"HD Wallet Seed" is a value used to generate the master private key and master chain code for an HD wallet. The wallet seed can be represented by mnemonic words, making it easier for humans to copy, back up, and restore private keys.

"Hold Fees" refers to the fee holding process: by default, Protocol Fees are paid automatically when funds are distributed from a Juicebox Treasury to an Ethereum address. During Funding Cycles configured to hold fees, this fee amount is set aside instead of being immediately processed. Projects can reclaim their held fees by adding funds to their Treasury equal to the amount of funds distributed to Ethereum addresses while fees were being held. Otherwise, Juicebox DAO or the project can process these held fees at any point to issue Juicebox Governance Token ("JBX") at the current rate. This allows a project to withdraw funds and later add them back into their the DAO treasury without incurring fees. This applies to both Distributions from the Distribution Limit and from the Overflow Allowance.

"Legal Order" means any restraining order, preliminary or permanent injunction, stay or other order, writ, injunction, judgment or decree that either: (i) is issued by a court of competent jurisdiction, or (ii) arises by operation of applicable law as if issued by a court of competent jurisdiction, including, in the case of clause "(ii)" an automatic stay imposed by applicable law upon the filing of a petition for bankruptcy.

"Legal Proceeding" means any private or governmental action, suit, litigation, arbitration, claim, proceeding (including any civil, criminal, administrative, investigative or appellate proceeding), hearing, inquiry, audit, examination or investigation commenced, brought, conducted or heard by or before, or otherwise involving, any court or other governmental entity or any arbitrator or arbitration panel.

"Liability" means any debt, obligation, duty or liability of any nature (including any unknown, undisclosed, unmatured, unaccrued, unasserted, contingent, indirect, conditional, implied, vicarious, inchoate derivative, joint, several or secondary liability), regardless of whether such debt, obligation, duty or liability would be required to be disclosed on a balance sheet prepared in accordance with generally accepted accounting principles and regardless of whether such debt, obligation, duty or liability is immediately due and payable. To be "Liable" means to have, suffer, incur, be obligated for or be subject to a Liability.

"Lien" means any lien, pledge, hypothecation, charge, mortgage, security interest, encumbrance, other possessory interest, conditional sale or other title retention agreement, intangible property right, claim, infringement, option, right of first refusal, preemptive right, exclusive license of intellectual property, community property interest or restriction of any nature including any restriction on the voting of any security or restriction on the transfer, use or ownership of any security or other asset.

A "Manager" is a person that is responsible, alone or in concert with others, for the management of an unincorporated nonprofit association.

"Majority Vote" means the approval of Members holding at least a majority-in-interest of applicable DAO voting Tokens.

"Material Adverse Exception Event" means that one or more of the following has occurred, is occurring or would reasonably be expected to occur:

- (i) a Consensus Attack adversely affecting the results or operations of the Designated Smart Contract;
- (ii) the Designated Smart Contract having become inoperable, inaccessible or unusable, including as the result of any code library or repository incorporated by reference into the Designated Smart Contract or any other smart contract or oracle on which the Designated Smart Contract depends having become inoperable, inaccessible or unusable or having itself suffered a Material Adverse Exception Event, *mutatis mutandis*;
- (iii) a material and adverse effect on the use, functionality or performance of the Designated Smart Contract as the result of any bug, defect or error in the Designated Smart Contract or the triggering, use or exploitation (whether intentional or unintentional) thereof (it being understood that for purposes of this clause "(iii)", a bug, defect or error will be deemed material

only if it results in a loss to a DAO Member or the DAO of at least **50%** of such DAO Member's distributable interest in the DAO Property and/or **50%** of the DAO Property);

- **(iv)** any unauthorized use of an administrative function or privilege of the Designated Smart Contract, including: (A) any use of any administrative credential, key, password, account or address by a Person who has misappropriated or gained unauthorized access to such administrative credential, key, password, account or address or (B) any unauthorized use of an administrative function or privilege by a DAO Member or a representative of a DAO Member; or
- (v) the Designated Smart Contract, any of the DAO Members or the DAO Property is subject to a Legal Order that prohibits the Designated Smart Contract (or that, if the Designated Smart Contract were a Person, would prohibit the Designated Smart Contract) from executing any function or operation it would otherwise reasonably be expected to execute.
- "Member" means each Person entering into this Agreement as a Member or subsequently admitted as a Member pursuant to the terms of this Agreement, but does not include any Person that has ceased to be a Member of the DAO. If at any time there is only one Member, then all references to "Members" shall be deemed to mean "Member."
- **A "Multi-Signature Wallet"** is a smart contract wallet on the Designated Blockchain Network that requires a minimum number of people to approve a transaction before it can occur (M-of-N).
- "Non-Fungible Tokens", "NFT", or "NFTs" means a cryptographic token based on the Ethereum ERC-721 standard, the ERC-1155 standard, or a similar standard or other blockchain-based asset.
- "Overflow" refers to funds in a Juicebox Treasury in excess of that Treasury's current Distribution Limit. A Project's Overflow can be reclaimed by redeeming that Project's Tokens, subject to a Project's Redemption Rate and other Project configurations.
- "Overflow Allowance" The amount of treasury funds that the Project Owner can distribute ondemand. This allowance does not reset each Funding Cycle. Instead, it lasts until the Project Owner explicitly proposes a reconfiguration with a new allowance. The protocol charges a Protocol Fee on funds withdrawn from the network. Overflow allowances can be specified in any currency that the IBPrices contract has a price feed for.
- "Payouts", "Distributions", and "Payout Splits" refer to the distribution of Treasury assets from a Juicebox Project Treasury to other Juicebox Projects or to external Ethereum addresses, or addresses on other blockchains. Payouts to Ethereum addresses invoke fees, the payment of which issues JBX Tokens in accordance with Juicebox DAO's Treasury configurations ("Fees" or "Protocol Fee").

Protocol Fees can range from 0% to 5% of Payout amounts to Ethereum addresses. As of August 4th 2022, Protocol Fees are equal to 2.5% of Payout amounts to Ethereum addresses.

- "Pause Payments", "Pause Distributions", "Pause Redemptions", and "Pause Burn" each refer to Treasury functions which Project Owners can pause in a Funding Cycle. These functions are not paused by default.
- "**Person**" means an individual, corporation, association, partnership, joint venture, limited liability company, estate, trust, or any other legal entity.
- "**Proceeding**" means any action, claim, suit, investigation, or proceeding by or before any court, arbitrator, governmental body, self-regulatory agency, or other agency.
- "Project", "Juicebox Project", "Treasury", and "Member Project" refer to projects deployed using the Juicebox-compatible protocol including any administrative NFTs, Project configurations, Protocol extensions, digital assets, and tokens associated with those projects.
- "Project Owner" and "Project Owners" refer to the individual or individuals with administrative access to configure one or more Juicebox Project(s). This includes individuals with access to Ethereum addresses holding one or more administrative ERC-721s issued by a Smart Contract which adheres to IJBProjects, as well as individuals with access to Ethereum addresses which have been granted permissions to take specific indexed actions via a Smart Contract which adheres to IJBOperatorStore.
- "Project Token" and "Token" refer to tokens and token balances stored in a Smart Contract which adheres to IJBTokenStore or tokens which adhere to IJBToken, including tokens issued by the Juicebox Protocol.
- "**Property**" means all property, whether real, personal, or mixed or tangible or intangible, or any right or interest therein.
- "Protocol", "Juicebox Protocol", and "Juicebox v2" refer to the Smart Contracts built and maintained by Juicebox DAO, as well as other ancillary Smart Contracts ("Protocol Extensions" or "Extensions"). This includes deployed Ethereum mainnet and Rinkeby testnet Smart Contracts with addresses listed at https://info.juicebox.money/dev/resources/addresses, as well as other Smart Contracts with source code copied or modified from the Smart Contracts currently and/or previously available at https://github.com/jbx-protocol.

Record, used as a noun, means information that is inscribed on a tangible medium or that is stored in an electronic or other medium and is retrievable in perceivable form.

"Redemption Rate", "Redemption Curve", or "Bonding Curve" refers to a bonding curve along which Juicebox Protocol calculates redemption from a Treasury. The Redemption Rate can be configured by a Project Owner each funding cycle. A rate of 100% suggests a linear proportion, meaning X% of treasury overflow can be reclaimed by redeeming X% of the token supply.

"Representative" means a Member, manager, officer, director, partner, employee, or agent.

"Reserved Rate" or "Reserved Tokens" refers to the percentage of newly minted tokens that a project wishes to withhold for custom distributions. The Project Owner can pre-program a list of addresses, other Projects, and contracts that adhere to [IJBSplitAllocator] to split reserved tokens between.

"Service Provider" means the Person appointed by the DAO to perform administrative services, responsibilities, and duties to carry on the DAO's operations. The initial Service Provider shall be decided by the DAO.

"Severability" signifies: in the event that one or more of the provisions of this Charter is for any reason held to be invalid, illegal or unenforceable, in whole or in part or in any respect, or in the event that any one or more of the provisions of this Charter operate or would prospectively operate to invalidate this Charter, then and in any such event, such provisions) only will be deemed null and void and will not affect any other provision of this Charter and the remaining provisions of this Charter will remain operative and in full force and effect and will not be affected, prejudiced, or disturbed thereby.

"Sign" means, with present intent to authenticate or adopt a record:

(a) to execute or adopt a tangible symbol; or (b) to attach to or logically associate with the record an electronic symbol, sound, or process.

"Smart Contract" refers to computer programs stored on the Designated Blockchain or other blockchains.

"Smart multisignature escrow": Bitcoin allows multisignature transaction contracts where, for example, three out of a given five keys are needed to spend the funds in that contract. Ethereum allows for more granularity; for example, four out of five given keys can spend everything in a contract, three out of five keys can be used to spend up to 10% of that contract's funds per day, and

two out of five keys can be used to spend up to 0.5% of that contract's funds per day. Additionally, Ethereum multisigs can be asynchronous - two parties can register their signatures on the blockchain at different times, and the last signature will automatically send the transaction.

"Start Timestamp" refers to the time at which a funding cycle is considered active. Projects can configure the start time of their first funding cycle to be in the future and can ensure reconfigurations don't take effect before a specified time. Once a funding cycle ends, a new one automatically starts right away. If there's an approved reconfiguration queued to start at this time, it will be used. Otherwise, a copy of the current funding cycle will be used.

"State" means a state of the United States, the District of Columbia, Puerto Rico, the United States Virgin Islands, or any territory or insular possession subject to the jurisdiction of the United States.

"**Token**" means a digital unit that is recognized by the Designated Client on the Designated Blockchain Network as capable of: (i) being uniquely associated with or "owned" by a particular public-key address on the Designated Blockchain Network at each particular block height; and (ii) having Transfers of such digital unit recorded on the Designated Blockchain.

"**Total Available Capital**" represents the total deployable capital in treasury reserves that can be used to fund DAO initiatives. Token holders will vote to determine how to use "Total Available Capital" reserves.

"Transfer" includes:

(a) an assignment; (b) a conveyance; (c) a sale; (d) a lease; (e) an encumbrance, including a mortgage or security interest; (f) a gift; and/or (g) a transfer by operation of law. (h) of a Token to a given address (the "Receiving Address") on the Designated Blockchain Network will be deemed to have occurred if and only if it is recognized by the Designated Client on the Designated Blockchain Network that: (i) there has been duly transmitted to the Designated Blockchain Network a new transfer function transaction that:(A) provides for the reassociation of the Designated Token with the Receiving Address; and (B) is signed by a private key that is (or a group of private keys that together are) sufficient to authorize the execution of such transfer function; and (ii) such transaction has been Confirmed.

"**Total Value Lock**" **or** "**TVL**" refers to the total value locked into a Smart Contract or set of Smart Contracts that may be deployed or stored at one or more exchanges or markets. This is used as a measurement of investor deposits. It is the dollar value of all the coins or tokens locked into a platform, protocol, lending program, yield farming program, or insurance liquidity pool.

"Unincorporated Nonprofit Association" means an unincorporated organization consisting of *two* or more Members joined under an agreement that is oral, in a record, or implied from conduct, for one or more common, nonprofit purposes. The term does not include:

(a) a trust; (b) a marriage, domestic partnership, common law domestic relationship, civil union, or other domestic living arrangement; (c) an organization formed under any other statute that governs the organization and operation of unincorporated associations; (d) a joint tenancy, tenancy in common, or tenancy by the entireties even if the co-owners share use of the property for a nonprofit purpose; or (e) a relationship under an agreement in a record that expressly provides that the relationship between the parties does not create an unincorporated nonprofit association.

Volatility A statistical measure of the price variation of an asset. Newer early-stage projects in the explosive growth stage tend to see very high volatility in the price of their assets in their early days. Volatile assets are often considered riskier than less volatile assets because the price is expected to be less predictable.

"Weight" is a number used to determine how many project tokens should be minted and transferred when payments are received during a Funding Cycle. In other words, Weight is the exchange rate between the project token and a currency (defined by a JBPayoutRedemptionPaymentTerminal) during a Funding Cycle. Project owners can configure this directly or allow it to be automatically derived from the previous funding cycle's Weight and

"Web3" is an idea for a new iteration of the World Wide Web which incorporates concepts such as decentralization, blockchain technologies, and token-based economics.

"Web3 tools": The key characteristics of Web3 tools may include personal assistance learning, artificial intelligence, multimedia information, interoperability, and semantic nature. Tools used for the governance, tokenization, Membership, voting and operation of a DAO.

"Yield farming" is the practice of staking or lending crypto assets in order to generate returns or rewards in the form of additional cryptocurrency. This application of decentralized finance (DeFi) has skyrocketed in popularity recently thanks to innovations like liquidity mining. In short, yield farming protocols incentivize liquidity providers (LP) to stake or lock up their crypto assets in a smart contract-based liquidity pool. These incentives can be a percentage of transaction fees, interest from lenders, or a governance token (see liquidity mining). These returns are expressed as an annual

Discount Rate.

percentage yield (APY). As more investors add funds to the related liquidity pool, the value of the issued returns decrease accordingly.

The DAO Members hereby ratify and approve all activities by the Service Provider taken in the furtherance of organizational and governance construction of the DAO and DAO affiliate entities, including the processing and execution of documents between shareholders, consultants, third parties, and directors. The DAO Members hereby ratify and approve all Service Provider actions and intentions for prior activities and for future activities and expenses related to these entities, their organization, and their governance.

2. DAOLABS Group

The DAO hereby ratifies the establishment of the following affiliates: **DAOLABS, LLC.**, **DAOLABS, INC.** and any permutations thereof, as well as the establishment of **PeaceDAO Unincorporated Nonprofit Association**, and **Movement DAO**.

The Unincorporated Nonprofit Association structure is sufficient for the purposes of PeaceDAO and Movement DAO.

3. Abstract

The DAO Members should ratify the indemnification of certain individuals who have acted on behalf of the DAO in various capacities: legal and accounting, including the disbursing of funds at the behest of other Members and the community and for the benefit of the DAO.

4. Authorization of "Meatspace" Activities

Future issuance of tokens, options, and stock are also authorized.

It is anticipated that the entities within the DAO Group will be registered in various jurisdictions including the States of Washington, Florida, and Delaware, as well as the British Virgin Islands. Nonetheless, the individuals referenced above are further authorized to take any action in furtherance of establishing banking relationships with various parties.

5. Indemnification of the DAO Service Provider and Certain Individuals

For the sake of clarity, this license is exclusive even as between the parties such that Licensor retains no right to use or license the Technology during the Term.

3. Terms of Payment.

Licensee shall pay Licensor for the conveyance of the rights it receives under this Agreement in the amounts and as described in Exhibit B to this Agreement. Upon termination of this Agreement, any amounts earned through the date of termination shall continue to be payable in accordance with the provisions of this Section 3.

4. Transfer of Modifications, Enhancements or Improvements of the Technology.

It is anticipated that Licensee may develop modifications, enhancements or improvements to the Technology. If, and to the extent that, Licensee invents, develops or otherwise creates any enhancement, modification, derivation, or other improvement to the technology and/or inventions disclosed in the Technology, ownership of such enhancement, modification, derivation or improvement shall be transferred to Licensor's ownership of the Technology.

An "Insolvency Proceeding" means the filing by or against the Licensee of any petition in bankruptcy or any petition for relief under the provisions of the Federal Bankruptcy Act, as amended, or any other state or federal law for the relief of debtors and the continuation of such petition without dismissal for a period of twenty (20) days or more; the appointment of a receiver or trustee to take possession of any property or assets of the Company; or the attachment of or execution against any property or assets of the Company, which remains unstayed for a period of ten (10) days.

9. Audit Rights.

Licensee agrees to keep adequate, accurate records of the amounts due hereunder and of all underlying transactions. Licensor and Authorized Representative shall have the right to audit all such records of Licensee reasonably related to Licensee's use of the Technology, to ensure that proper records are being kept and to verify all reports and payments due hereunder. The cost of such audit will be borne by Licensee. A discrepancy shall be deemed material if it involves payment or adjustment of more than five percent of reported payment. Any additional payments shown to be due as a result of the audit will be paid promptly by Licensee, along with interest on such amounts from the date originally due, upon conclusion of the audit. An audit may be conducted on Licensor's behalf by an

independent third party auditor or an individual auditor selected by Licensor or the Authorized Representative with a minimum of three (3) days notice during normal business hours no more than once each calendar year. The auditor shall execute an appropriate confidentiality agreement prior to beginning its audit.

10. Third-Party Infringement; Notice and Right to Sue.

If, at any time during the period during which Licensee holds a license hereunder, either party shall become aware of any infringement or threatened infringement of any Technology, said party shall forthwith give notice thereof to the other party. Such notice shall include the identification of the third party or parties thought to be the infringers, the product(s), systems or activities thought to constitute the infringement, along with the basis for suspecting the infringement including an analysis giving the legal and factual basis for believing the Technology has been infringed, along with any documentary evidence of such suspected infringement and identification of witnesses with knowledge of such suspected infringement. Within one hundred and eighty (180) days after learning of an alleged infringement, Licensee shall file a lawsuit in its own name or take other similar affirmative legal action against the alleged infringer or shall give written notice to Licensor of Licensee's intent not to take such action. If no such action is commenced by Licensee within the 180 day time period, or if Licensee provides notice of intent not to take such action, then (as Licensor's sole remedy for such failure to act by Licensee) Licensor shall have the right, but not the obligation, to bring an action at its own expense. For the purpose of such proceedings, Licensor shall permit, if legally necessary, the use of its name, shall give Licensee reasonable assistance, and shall execute such documents and do such acts as may be reasonably necessary. Any action for infringement of the Technology undertaken by either party hereunder shall be at such party's own expense including any legal fees, costs or other expenses. In the event there is a settlement or a recovery in a claim pursued by either party, any and all recovery shall first be applied to reimburse the parties for the costs each party incurred in the action and the remainder shall be allocated between the Licensor and the Licensee pursuant to the terms of payment set forth in Section 3 as though the amounts received were gross revenue received by Licensee.

11. Indemnity.

Licensee will reimburse, indemnify, defend and hold harmless Licensor and Authorized Representative from and against and in respect of any and all damages, losses, deficiencies, liabilities, costs and expenses incurred or suffered by Licensee that result from, relate to or arise out of any third party claim including of actual or alleged infringement of intellectual property rights by the exercise of the rights granted herein to the Technology (a "Claim"). Licensee will advance ten thousand dollars (\$10,000) to Licensor and the Authorized Representative in the event of a threatened claim by any party, including by Licensee itself.

12. Injunctive Relief.

The parties hereto specifically acknowledge and agree that the remedy at law for any breach of the foregoing will be inadequate and that each party, in addition to any other relief available to it, shall be entitled to temporary and permanent injunctive relief without the necessity of proving actual damage. In the event that the provisions of this Section should ever be deemed to exceed the limitation provided by applicable law, then the parties hereto agree that such provisions shall be reformed to set forth the maximum limitations permitted by such law.

13. Confidentiality.

Notwithstanding the foregoing, each party may disclose Confidential Information of the other party to their employees, agents, contractors or consultants on a need-to-know basis. In addition, if either party intends to disclose all or portions of this Agreement or any related document in accordance with any judicial order or other federal, state or local governmental statute, rule, regulation or order, where such disclosure would be a disclosure of Confidential Information if it was not pursuant to legal process, the party intending to make such disclosure must give the other party reasonable notice prior to such disclosure; after receipt of such notice, the party so advised shall be solely responsible for asserting and filing any objections to such disclosure, invoking any governmental, judicial or administrative procedures for protecting against such disclosure, and obtaining any applicable protective order or equivalent, and the Licensee shall not be required to delay any timely filings to comply with any judicial order or other federal, state or local governmental statute, rule, regulation or order; except that the party intending to make such disclosure may not disclose such information for which procedures for protecting against such disclosure have been invoked until the conclusion of such procedures. Nothing in this section is to be construed as granting either party the right to disclose Confidential Information over the other party's objection.

14. Assignment; Successors and Assigns.

This Agreement will be binding upon and inure to the benefit of each party's respective successors and lawful assigns. Licensor may not assign this Agreement, in whole or in part, without Licensee and the Authorized Representative's prior written approval. The Authorized Representative will provide one (\$1) dollar to Licensee in consideration for this right. This Agreement may only be assigned by Licensee, with both the Licensor and Authorized Representative's written approval. Licensee will provide notice to Licensor of any contemplated assignment within thirty (30) days prior. Any assignment prior to such written approval will be void ab initio. For purposes of this Agreement, an assignment includes (a) a merger with another entity and any other transfer by operation of law, (b) the sale or transfer of all or substantially all of a party's assets, (c) an acquisition of a majority of a party's voting stock or other voting interests by a third party, and (d) change in beneficial ownership of a majority of a party's ownership equity.
